

AKRON®

Efficiently Moving Grain

ER300C BAG ROLLER

For 6-, 9-, and 10-foot bags
up to 100 m long.

- Adjustable to any EXG300 regardless the year of manufacture.
- Hydraulic circuit directly from the tractor.
- Two-spool hydraulic command.
- 2 positions:

Work/Transport:

It features a quick system, activated with the user's foot, to swing the roller and switch from work to transport position.

- It rolls up the grain bag into tight bales in less than 5 minutes.
- The ER300C unwraps the grain bag from the unloader roller and rolls it up into a tight bale.
- It bales used grain bags disposed on the ground.
- Tight bales ready to load into your truck.
