

Azer's Interactive Periodic Table Study Set

Azer's Interactive Periodic Table Study Set

This interactive study set is designed to make learning about the periodic table accessible to students who are blind and visually impaired.

Inspired by Samir Azer, a science teacher at the Kentucky School for the Blind, this set can be used to assist students who benefit from a hands-on, interactive model. Special attention was given to make the materials tactually discriminable and visually appealing to the target population, yet appropriate for all students regardless of visual acuity.

Features

- Materials that complement APH's Periodic Table of the Elements Reference Chart
- Assists in the instruction and demonstration of concepts that are consistent with the National Science Standards
- Used to teach students about the arrangement of the periodic table, atomic structure, ionic and covalent bonding, and balancing chemical equations

Includes

- 294 interactive hexagonal element pieces
- Additional interactive accessories including coefficient, oxidation and subscript numbers, arrows, plus signs, parentheses, and assessment pieces

WARNING: Choking Hazard—Small Parts. Not intended for children ages 5 and under without supervision.
