

Color Raceway

Color Raceway

This exciting board game is adapted for children who have visual impairments, including those with a CVI diagnosis, and utilizes the characteristics of color, movement, and low to high complexity, encouraging players to use their vision in a functional and fun way.

Use Color Raceway to increase orientation and mobility skills, color awareness, and positive social interaction skills (sharing/taking turns with others).

Teachers and parents of young students may use Color Raceway's kit of accessories to design an individualized game board for each player, building upon players' individual strengths and assisting parents/teachers in understanding the level of materials with which players are most successful. Sighted peers will want to join the fun also!

Includes

- Game board
- Set of traffic signs – 8 red stop signs, 8 yellow yield signs, 8 black/white checkered flags
- 12 reflective, color cards (4 green, 4 yellow, 4 red)
- Spinner with 3 reflective, color sections (green, yellow, red)
- Hook & Loop adhesive material to attach cars to track and traffic signs to grassy infield
- Braille stickers for color cards and spinner
- Guidebook (large print)

Note: Toy cars not included.

WHAT OUR TVI FIELD TESTERS HAD TO SAY:

"I love how Color Raceway can be used with all learners, with or without a visual impairment!"

"A fun new way to learn about matching and the concept of sameness."

"Great for students of all ages."

"Sighted peers were anxious to play with my students."
