

Flip-Over Concept Book: **FRACTIONS**

Flip-Over Concept Book: FRACTIONS

This interactive print and braille book is designed to teach elementary students who are blind and visually impaired about fractions, decimals, and percentages.

Teachers and parents can create their own lessons by fully customizing the presentation of the fraction panels offered in the book.

Features

- Pie charts, fractions, decimals, percentages, and comparative sign panels
- Fractions in the form of halves, thirds, fourths, fifths, sixths, eighths, and tenths
- Customize the location and number of the panels in the book to your/your students' desire - panels can be stacked, shuffled, and randomized.
- Activities address the Principles and Standards for School Mathematics (National Council of Teachers of Mathematics) for Numbers and Operations, Grades Pre-K-5, and the Common Core State Standards for Numbers and Operations - Fractions, Grades 3-5

Helps students

- Understand fractions as parts of a whole
- Compare and order fractional parts of a whole
- Form judgments about the size of fractions
- Find and compare equivalent fractions
- Compare fractions by reasoning about size
- Investigate relationships between fractions
- Recognize equivalent forms of commonly used fractions, decimals, and percentages

WARNING: Choking Hazard—Small Parts. Not intended for children ages 5 and under without supervision.
