

Radio PSA Transcripts for COVID-19 Transmission

60-Second Version

I am _____ from _____. Coronavirus is in our community.

A person can be sick with Coronavirus without knowing it. Coronavirus causes serious symptoms in some people and mild or no symptoms in others.

People with mild or no symptoms can still spread Coronavirus to other people by coughing, sneezing, or talking near another person, or touching shared objects with unwashed hands.

Anyone can be sick with Coronavirus and spread it to others. Stay home as much as possible and avoid large gatherings. If you must go out, treat everyone like they are sick and keep six feet of distance. Always wear a mask over your mouth and nose in public. Wash your hands often with soap and water or hand sanitizer, and do not touch your eyes, nose, and mouth. Cough and sneeze into a tissue or the inside of your elbow.

Let's work together to keep our community safe. Visit [CDC-dot-gov-slash-Coronavirus](https://www.cdc.gov/coronavirus) for more information.
