FUEL TANK & CAP

NOTE: When ordering a fuel tank (item 37) or fuel tank cap (item 35) **DO NOT MIX OLD STYLE TANK AND CAP WITH NEW STYLE TANK AND CAP.**

If you have a power unit and it was purchased prior to 2011 and need to replace the fuel tank or fuel tank cap, you must purchase the same tank and cap that came with your unit.

For example if you have a power unit prior to 2011 do not purchase a new style fuel tank, your engine will not be equipped with a fuel vapor fitting.

The old style fuel cap is a vented cap, while the new style fuel cap is not a vented cap and venting is achieved thru the vapor line.

The old style fuel tank has only one fuel line coming from the tank to the engine. The new style fuel tank has two lines coming from the fuel tank to the engine, one is the fuel line and the other is a fuel vapor line.

OLD STYLE FUEL TANK & CAP (PRIOR TO 2011)

NEW STYLE FUEL TANK & CAP (2011 & FORWARD)
