PLUS Korea Manufacturing Core Alliance Index ETF
(NYSE Arca Ticker: KMCA)
(the "Fund")

Supplement dated September 25, 2026, to the Fund's currently effective Summary Prospectus and Prospectus

This supplement provides new and additional information beyond that contained in the Summary Prospectus and Prospectus and should be read in conjunction with those documents.

Akros Index Engineering, Inc. (the "Index Administrator"), the creator and the administrator of the Akros Korea Manufacturing Core Alliance Index (the "Index"), announced changes to the Index methodology that are effective September 28, 2026. Index adjustments reflecting the revised methodology will be made at the next Index rebalancing on the last trading day of September 2026.

Effective September 28, 2026, the fifth paragraph of the "Principal Investment Strategies" section is deleted in its entirety and restated as follows:

After all potential Index constituents have been identified and scored, the Index applies a weighting methodology by applicable Korean Manufacturing Industry whereby approximately 60% of the Index is weighted to the AI Semiconductor Industry; 10% to each of the Rechargeable Battery, Power Grid & Nuclear Energy, and Robotics & Humanoid Industries; and 5% to each of the Shipbuilding and Defense industries, respectively. The target size of the Index is 35 constituents. Within the AI Semiconductor sector, the top two constituents by relative ranking are each assigned a fixed weight of 24.5%, with the remaining AI Semiconductor constituents sharing the residual 11% allocation. With the exception of the top two AI Semiconductor sector constituents, no individual Index constituent can exceed 4.5% of the Index.

PLEASE RETAIN THIS SUPPLEMENT FOR FUTURE REFERENCE.

Fund Summary – PLUS Korea Manufacturing Core Alliance Index ETF

Investment Objective

The PLUS Korea Manufacturing Core Alliance Index ETF (the "Fund") seeks to provide investment results that, before fees and expenses, correspond generally to the total return performance of the Akros Korea Manufacturing Core Alliance Index (the "Index").

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses *(expenses that you pay each year as a percentage of the value of your investment)*	
Management Fee	0.65%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses[1]	0.00%
Total Annual Fund Operating Expenses	0.65%

[1] Based on estimated amounts for the current fiscal year.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses (including one year of capped expenses each period) remain the same. Although your actual costs may be higher or lower, based on these assumptions your cost would be:

1 Year	3 Years
$66	$208

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when shares of the Fund are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example above, affect the Fund's performance. Because the Fund is new, portfolio turnover information is not yet available.

Principal Investment Strategies

The Fund normally invests in securities comprising the Index. Under normal circumstances, the Fund invests at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in securities comprising the Index. The Index is designed to track the performance of South Korean companies that have demonstrated high relevance to Korea's core manufacturing industries (each a "Korean Manufacturing Industry" and collectively, "Korean Manufacturing Industries"), which the Index has defined as the following:

- Artificial Intelligence ("AI") Semiconductor Industry: Companies whose core business includes AI semiconductor-related products such as high bandwidth memory, multi-layer board substrates, multilayer ceramic capacitors, semiconductor packaging equipment, and other products.
- Rechargeable Battery Industry: Companies whose core business includes electric vehicles battery cells, energy storage systems, or battery materials (e.g., cathode/anode materials).
- Shipbuilding Industry: Companies whose core business includes naval shipbuilding (e.g., warships, submarines), commercial shipbuilding (e.g., liquid natural gas carriers, container ships), or marine engine manufacturing.
- Defense Industry: Companies whose core business includes defense platforms (e.g., aircraft engines, artillery, armored vehicles, missiles, fighter jets) or defense electronics systems.
- Power Grid & Nuclear Energy Industry: Companies whose core business includes power grid equipment (e.g., transformers, high voltage direct current, switchgear) or nuclear power plant equipment/construction.
- Robotics & Humanoid Industry: Companies whose core business is humanoid/robotics development or pure-play manufacturers of critical humanoid-specific components such as actuators and reducers.

The universe of eligible Index components consists of all the common stocks included in the Korea Composite Stock Price Index (KOSPI), except that the Index may also draw Robotics & Humanoid Industry companies from KOSDAQ (Korea Securities Dealers Automated Quotations) if it cannot meet the weight requirement from KOSPI listed securities alone. From that universe, each Korean Manufacturing Industry draws eligible companies from a defined set of industries under the Akros Industry Classification System ("AICS"):

Korean Manufacturing Industry	**Underlying AICS Classifications**
AI Semiconductor	Machinery Manufacturing; Computer and Electronic Product Manufacturing; Conglomerates
Rechargeable Battery	Electrical Equipment, Appliance, and Component Manufacturing
Shipbuilding	Machinery Manufacturing; Transportation Equipment Manufacturing
Defense	Computer and Electronic Product Manufacturing; Transportation Equipment Manufacturing
Power Grid & Nuclear Energy	Utilities; Construction of Buildings; Fabricated Metal Product Manufacturing; Electrical Equipment
Robotics & Humanoid	Fabricated Metal Product Manufacturing; Machinery Manufacturing; Computer and Electronic Product Manufacturing; Electrical Equipment; Transportation Equipment Manufacturing; Professional, Scientific, and Technical Services

In addition, to be eligible for inclusion in the Index, a company must have a minimum market capitalization of at least $100 million USD, a three-month average daily traded value of at least $1 million USD and is ranked in the top 200 securities on the KOSPI (except as noted for Robotics & Humanoid Industry companies) based on free-float market capitalization.

From the eligible securities, the Index applies a scoring methodology to identify Korean Manufacturing Industry companies by utilizing a large language model, a type of AI program that uses deep learning algorithms to process large amounts of data, to search for keywords that have been publicly disclosed through regulatory filings, quarterly earnings reports, company presentations or other reputable public news sources to apply a relevance-based scoring methodology for each company's relevance to its applicable Korean Manufacturing Industry. In addition, priority is given to Index constituents which derive more than 50% of their revenues from the applicable Korean Manufacturing Industry. At least 80% of the total portfolio is allocated to companies whose applicable Korea Manufacturing Industry related revenue exceeds 50%, which is consistent with the composition of the Index.

After all potential Index constituents have been identified and scored, the Index applies a weighting methodology by applicable Korean Manufacturing Industry whereby approximately 40% of the Index is weighted to the AI Semiconductor Industry, and approximately weighted 12% to each of the Rechargeable Battery, Shipbuilding, Defense, Power Grid & Nuclear Energy, and Robotics & Humanoid Industries, respectively. The target size of the Index is 35 constituents, and no individual index constituent can exceed 9% of the Index. The Index is rebalanced and reconstituted on a quarterly basis.

The Fund will concentrate its investments (i.e., invest more than 25% of its total assets) in a particular industry or group of industries to approximately the same extent the Index concentrates in an industry or group of industries. As of April 7, 2026, the Index was concentrated in the AI Semiconductor Industry, as defined by AICS.

The Fund is a "non-diversified" investment company under the Investment Company Act of 1940 (the "1940 Act") and, therefore, may invest a greater percentage of its assets in a particular issuer than a diversified fund. The Index may change the definition of "Korean Manufacturing Industries" over time, and therefore the underlying industry exposures, percentages represented by certain industries, and components of the Index may change over time.

The Index is owned by Hanwha Asset Management Co., Ltd (the "Index Provider"). The Index was created by Akros Index Engineering, Inc. (the "Index Administrator"), which is not affiliated with the Fund or the Adviser. The Index Administrator developed the methodology for determining the securities to be included in the Index and is responsible for the ongoing maintenance of the Index, oversight of the implementation of the index methodology, and changes in classification of the securities in the Index. The Index is calculated by Solactive AG ("Solactive"), which is not affiliated with the Fund, the Adviser, or the Index Provider.

The Index may identify publicly-traded Korean companies that are affiliates of the Index Provider. The Index Provider is not affiliated with the Fund, Adviser, Index Administrator, or the Fund's administrator, custodian, transfer agent, or the Distributor (defined below), or any of their respective affiliates. The Index Provider has no ability to influence or change the operation of the Index.

Principal Risks

As with all funds, a shareholder is subject to the risk that his or her investment could lose money. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency. The principal risks affecting shareholders' investments in the Fund, either directly or through its investments in an ETF, are set forth below.

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. A limited number of institutions act as authorized participants for the Fund. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders and no other authorized participant steps forward to create or redeem, the Fund's shares may trade at a premium or discount (the difference between the market price of the Fund's shares and the Fund's net asset value) and possibly face delisting and the bid/ask spread (the difference between the price that someone is willing to pay for shares of the Fund at a specific point in time versus the price at which someone is willing to sell) on the Fund's shares may widen.

Cash Transactions Risk. The Fund may effect all or a portion of its creations and redemptions for cash rather than in-kind. As a result, an investment in the Fund may be less tax-efficient than an investment in an ETF that effects its creations and redemptions only in-kind. ETFs are able to make in-kind redemptions and avoid being taxed on gains on the distributed portfolio securities at the fund level. A fund that effects redemptions for cash may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. Any recognized gain on these sales by the Fund will generally cause the Fund to recognize a gain it might not otherwise have recognized, or to recognize such gain sooner than would otherwise be required if it were to distribute portfolio securities only in-kind. The Fund intends to distribute these gains to shareholders to avoid being taxed on this gain at the fund level and otherwise comply with the special tax rules that apply to it. This strategy may cause shareholders to be subject to tax on gains they would not otherwise be subject to, or at an earlier date than if they had made an investment in a different ETF. Moreover, cash transactions may have to be carried out over several days if the securities market is relatively illiquid and may involve considerable brokerage fees and taxes. These brokerage fees and taxes, which will be higher than if the Fund sold and redeemed its shares entirely in-kind, will be passed on to those purchasing and redeeming Creation Units in the form of creation and redemption transaction fees. In addition, these factors may result in wider spreads between the bid and the offered prices of the Fund's shares than for ETFs that distribute portfolio securities in-kind. The Fund's use of cash for creations and redemptions could also result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund's ability to achieve its investment objective.

Currency Exchange Rate Risk. The Fund invests in securities denominated in South Korean won. Investments denominated in non-U.S. currencies and investments in securities or derivatives that provide exposure to such currencies, currency exchange rates or interest rates are subject to non-U.S. currency risk. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Because the Fund's net asset value is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in the Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in the Fund's holdings goes up. Conversely, the U.S. dollar value of your investment in the Fund may go up if the value of the local currency appreciates against the U.S. dollar.

Current Market Conditions Risk. Current market conditions risk is the risk that a particular investment, or shares of the Fund in general, may fall in value due to current market conditions. As a means to fight inflation, the Federal Reserve and certain foreign central banks have previously raised interest rates. The Federal Reserve has recently lowered interest rates and may continue to do so in the future. U.S. regulators have proposed several changes to market and issuer regulations which would directly impact the Fund, and any regulatory changes could adversely impact the Fund's ability to achieve its investment strategies or make certain investments. Recent and potential future bank failures could result in disruption to the broader banking industry or markets generally and reduce confidence in financial institutions and the economy as a whole, which may also heighten market volatility and reduce liquidity. The ongoing adversarial political climate in the United States, as well as political and diplomatic events both domestic and abroad, have and may continue to have an adverse impact the U.S. regulatory landscape, markets and investor behavior, which could have a negative impact on the Fund's investments and operations. Other unexpected political, regulatory and diplomatic events within the U.S. and abroad may affect investor and consumer confidence and may adversely impact financial markets and the broader economy. For example, ongoing armed conflicts between Russia and Ukraine in Europe and conflicts in the Middle East, have caused and could continue to cause significant market disruptions and volatility within the markets in Russia, Europe, the Middle East and the United States. The hostilities and sanctions resulting from those hostilities have and could continue to have a significant impact on certain Fund investments as well as Fund performance and liquidity. The economies of the United States and its trading partners, as well as the financial markets generally, may be adversely impacted by trade disputes and other matters. For example, the United States has imposed trade barriers and restrictions on China. In addition, the Chinese government is engaged in a longstanding dispute with Taiwan, continually threatening an invasion. If the political climate between the United States and China does not improve or continues to deteriorate, if China were to attempt invading Taiwan, or if other geopolitical conflicts develop or worsen, economies, markets and individual securities may be adversely affected, and the value of the Fund's assets may go down. The COVID-19 global pandemic, or any future public health crisis, and the ensuing policies enacted by governments and central banks have caused and may continue to cause significant volatility and uncertainty in global financial markets, negatively impacting global growth prospects. While vaccines have been developed, there is no guarantee that vaccines will be effective against emerging future variants of the disease. As this global pandemic illustrated, such events may affect certain geographic regions, countries, sectors and industries more significantly than others. Advancements in technology may also adversely impact markets and the overall performance of the Fund. For instance, the economy may be significantly impacted by the advanced development and increased regulation of artificial intelligence. These events, and any other future events, may adversely affect the prices and liquidity of the Fund's portfolio investments and could result in disruptions in the trading markets.

Custody Risk. Less developed securities markets, such as South Korea, are more likely to experience problems with the clearing and settling of trades, as well as the holding of securities by local banks, agents and depositories.

Cybersecurity Risk. The Fund is susceptible to operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cyber security breaches may involve unauthorized access to the Fund's digital information systems through "hacking" or malicious software coding but may also result from outside attacks such as denial-of-service attacks through efforts to make network services unavailable to intended users. In addition, cyber security breaches of the issuers of securities in which the Fund invests or the Fund's third-party service providers, such as its administrator, transfer agent, custodian, or sub-adviser, as applicable, can also subject the Fund to many of the same risks associated with direct cyber security breaches. Although the Fund has established risk management systems designed to reduce the risks associated with cyber security, there is no guarantee that such efforts will succeed, especially because the Fund does not directly control the cyber security systems of issuers or third-party service providers.

Equity Securities Risk. The value of the Fund's shares will fluctuate with changes in the value of the equity securities in which it invests. Equity securities prices fluctuate for several reasons, including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant equity market, such as market volatility, or when political or economic events affecting an issuer occur. Common stock prices may be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase. Equity securities may decline significantly in price over short or extended periods of time, and such declines may occur in the equity market as a whole, or they may occur in only a particular country, company, industry or sector of the market.

Foreign Securities Risk. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to expropriation, nationalization or adverse political or economic developments. Foreign securities may have relatively low market liquidity and decreased publicly available information about issuers. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. Non-U.S. issuers may also be subject to inconsistent and potentially less stringent accounting, auditing, financial reporting and investor protection standards than U.S. issuers. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments. In addition, where all or a portion of the Fund's portfolio holdings trade in markets that are closed when the Fund's market is open, there may be valuation differences that could lead to differences between the Fund's market price and the value of the Fund's portfolio holdings.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The country or region in which the Fund invests may have experienced security concerns, war or threats of war and aggression, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility, each of which may impact the Fund's investments.

Index Concentration Risk. The Fund will be concentrated in an industry or a group of industries to the extent that the Index is so concentrated. To the extent that the Fund invests a significant percentage of its assets in a single asset class or the securities of issuers within the same country, state, region, industry or sector, an adverse economic, business or political development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. A significant exposure makes the Fund more susceptible to any single occurrence and may subject the Fund to greater market risk than a fund that is more broadly diversified. There may be instances in which the Index, for a variety of reasons including changes in the prices of individual securities held by the Fund, has a larger exposure to a small number of stocks or a single stock relative to the rest of the stocks in the Index. Under such circumstances, the Fund will not deviate from the Index except in rare circumstances or in an immaterial way and therefore the Fund's returns would be more greatly influenced by the returns of the stock(s) with the larger exposure.

Index Provider Risk. There is no assurance that the Index Provider, or any agents that act on its behalf, will compile the Index accurately, or that the Index will be determined, maintained, constructed, reconstituted, rebalanced, composed, calculated or disseminated accurately. The Index Provider and its agents do not provide any representation or warranty in relation to the quality, accuracy or completeness of data in the Index, and do not guarantee that the Index will be calculated in accordance with its stated methodology. The Adviser's mandate as described in this prospectus is to manage the Fund consistently with the Index provided by the Index Provider. The Adviser relies upon the Index provider and its agents to accurately compile, maintain, construct, reconstitute, rebalance, compose, calculate and disseminate the Index accurately. Therefore, losses or costs associated with any Index Provider or agent errors generally will be borne by the Fund and its shareholders. To correct any such error, the Index Provider or its agents may carry out an unscheduled rebalance of the Index or other modification of Index constituents or weightings. When the Fund in turn rebalances its portfolio, any transaction costs and market exposure arising from such portfolio rebalancing will be borne by the Fund and its shareholders. Unscheduled rebalances also expose the Fund to additional tracking error risk. Errors in respect of the quality, accuracy and completeness of the data used to compile the Index may occur from time to time and may not be identified and corrected by the Index Provider for a period of time or at all, particularly where the Index is less commonly used as a benchmark by funds or advisors. For example, during a period where the Index contains incorrect constituents, the Fund tracking the Index would have market exposure to such constituents and would be underexposed to the Index's other constituents. Such errors may negatively impact the Fund and its shareholders. The Index Provider and its agents rely on various sources of information to assess the criteria of issuers included in the Index, including information that may be based on assumptions and estimates. Neither the Fund nor the Adviser can offer assurances that the Index's calculation methodology or sources of information will provide an accurate assessment of included issuers. Unusual market conditions or issuer-specific events may cause the Index Provider to postpone a scheduled rebalance, exclude or substitute a security in the Index or undertake other measures which could cause the Index to vary from its normal or expected composition. The postponement of a scheduled rebalance in a time of market volatility could mean that constituents that would otherwise be removed at rebalance due to changes in market capitalizations, issuer credit ratings, or other reasons may remain, causing the performance and constituents of the Index to vary from those expected under normal conditions. Apart from scheduled rebalances, the Index Provider or its agents may carry out additional ad hoc rebalances to the Index due to unusual market conditions or in order, for example, to correct an error in the selection of index constituents.

Industry Concentration Risk. Because the Fund's assets will be concentrated in an industry or group of industries to the extent the Index concentrates in a particular industry or group of industries, the Fund is subject to loss due to adverse occurrences that may affect that industry or group of industries. The list below is not a comprehensive list of the industries to which the Fund may have exposure over time and should not be relied on as such. As of April 7, 2026, the Index was concentrated in the AI Semiconductor Industry, as defined by AICS.

> *AI Semiconductor Industry Risk.* Semiconductor companies face intense competition, both domestically and internationally, and such competition may have an adverse effect on profit margins. Semiconductor companies may have limited product lines, markets, financial resources or personnel. Semiconductor companies' supply chain and operations are dependent on the availability of materials that meet exacting standards and the use of third parties to provide components and services. Semiconductor companies may rely on a limited number of suppliers, or upon suppliers in a single location, for certain materials, equipment or tools. Finding and qualifying alternate or additional suppliers can be a lengthy process that can cause production delays or impose unforeseen costs, and such alternatives may not be available at all. Production can be disrupted by the unavailability of resources, such as water, silicon, electricity, gases and other materials. Suppliers may also increase prices or encounter cybersecurity or other issues that can disrupt production or increase production costs. The products of semiconductor companies may face obsolescence due to rapid technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Capital equipment expenditures could be substantial, and equipment generally suffers from rapid obsolescence. Companies in the semiconductor industry are heavily dependent on patent and intellectual property rights. The loss or impairment of these rights would adversely affect the profitability of these companies.

International Closed Market Trading Risk. Because securities held by the Fund trade on non-U.S. exchanges that are closed when the Fund's primary listing exchange is open, there are likely to be deviations between the current price of an underlying security and the last quoted price for the underlying security (i.e., the Fund's quote from the closed foreign market) used for purposes of calculating the Fund's net asset value, resulting in premiums or discounts to the Fund's net asset value that may be greater than those experienced by other exchange-traded funds. In addition, shareholders may not be able to purchase and sell shares of the Fund on the listing exchange for the Fund, on days when the net asset value of the Fund could be significantly affected by events in the relevant foreign markets.

Investable Universe of Companies Risk. The investable universe of companies in which the Fund may invest may be limited. If a company no longer meets the Index Provider's criteria for inclusion in the Underlying Index, the Fund may need to reduce or eliminate its holdings in that company. The reduction or elimination of the Fund's holdings in the company may have an adverse impact on the liquidity of the Fund's overall portfolio holdings and on Fund performance.

Manufacturing Companies Risk. Companies involved in manufacturing or manufacturing-related activities face a number of risks, including supply chain and distribution disruptions, business interruptions, obsolescence, third-party vendor risks, cyber attacks, trade disputes, product recalls, liability claims, scarcity of materials or parts, excess capacity, changes in consumer preferences, and volatility in commodity prices and currencies. The performance of such companies may also be affected by technological developments, labor relations, legislative and regulatory changes, government spending policies, and changes in domestic and international economies.

Market Maker Risk. The Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares due to a limited number of market markers. Decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. The Fund may rely on a small number of third-party market makers to provide a market for the purchase and sale of shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's net asset value and the price at which the Fund's shares are trading on the Exchange, which could result in a decrease in value of the Fund's shares. This reduced effectiveness could result in Fund shares trading at a discount to net asset value and also in greater than normal intraday bid-ask spreads for Fund shares.

Market Risk. Market risk is the risk that a particular investment, or shares of the Fund in general, may fall in value. Securities are subject to market fluctuations caused by real or perceived adverse economic, political, and regulatory factors or market developments, changes in interest rates and perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments. In addition, local, regional or global events such as war, acts of terrorism, market manipulation, government defaults, government shutdowns, regulatory actions, political changes, diplomatic developments, the imposition of sanctions and other similar measures, spread of infectious diseases or other public health issues, recessions, natural disasters, or other events could have a significant negative impact on the Fund and its investments. Any of such circumstances could have a materially negative impact on the value of the Fund's shares, the liquidity of an investment, and may result in increased market volatility. During any such events, the Fund's shares may trade at increased premiums or discounts to their net asset value, the bid/ask spread on the Fund's shares may widen and the returns on investment may fluctuate.

Mid-Capitalization Companies Risk. Mid capitalization companies may be more vulnerable to adverse general market or economic developments and thus may experience greater price volatility than more established large capitalization companies. Securities of mid capitalization companies may also be less liquid than securities of large capitalization companies and may have more limited trading volumes. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

New Fund Risk. The Fund is new and currently has fewer assets than larger funds, and like other new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected. Additionally, because the Fund has fewer assets than larger funds over which to spread its fixed costs, its expense levels on a percentage basis will be higher than that of a larger Fund.

Non-Correlation Risk. The Fund's return may not match the return of the Index for a number of reasons. The Fund incurs operating expenses not applicable to the Index, and may incur costs in buying and selling securities, especially when rebalancing the Fund's portfolio holdings to reflect changes in the composition of the Index. In addition, the Fund's portfolio holdings may not exactly replicate the securities included in the Index or the ratios between the securities included in the Index. Additionally, in order to comply with its investment strategies and policies, the Fund portfolio may deviate from the composition of the Index. Accordingly, the Fund's return may underperform the return of the Index.

Non-Diversification Risk. The Fund is non-diversified under the 1940 Act, meaning that, as compared to a diversified fund, it can invest a greater percentage of its assets in securities issued by or representing a small number of issuers. As a result, the performance of these issuers can have a substantial impact on the Fund's performance.

Operational Risk. The Fund is subject to risks arising from various operational factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund relies on third-parties for a range of services, including custody. Any delay or failure relating to engaging or maintaining such service providers may affect the Fund's ability to meet its investment objective. Although the Fund and the Fund's investment adviser seek to reduce these operational risks through controls and procedures, there is no way to completely protect against such risks.

Passive Investment Risk. The Fund is not actively managed. The Fund invests in securities included in or representative of the Index regardless of investment merit. The Fund generally will not attempt to take defensive positions in declining markets. In the event that the Index is no longer calculated, the Index license is terminated or the identity or character of the Index is materially changed, the Fund will seek to engage a replacement index. The Fund will be concentrated in an industry or a group of industries to the extent that the Index is so concentrated. To the extent that the Fund invests a significant percentage of its assets in a single asset class or the securities of issuers within the same country, state, region, industry or sector, an adverse economic, business or political development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. To the extent circumstances evolve in between reconstitutions, the Index may include, and the Fund may therefore hold for a period of time, securities of companies that do not align with the Index's objective and/or criteria. When there are changes made to the component securities of the Index and the Fund in turn makes similar changes to its portfolio, any transaction costs and market exposure arising from such portfolio changes will be borne directly by the Fund and its shareholders. The Fund may recognize gains as a result of rebalancing or reconstituting its securities holdings to reflect changes in the securities included in the Index. The Fund also may be required to distribute any such gains to its shareholders to avoid adverse U.S. federal income tax consequences.

Premium/Discount Risk. The market price of the Fund's shares will generally fluctuate in accordance with changes in the Fund's net asset value as well as the relative supply of and demand for shares on the Exchange. The Fund's investment adviser cannot predict whether shares will trade below, at or above their net asset value because the shares trade on the Exchange at market prices and not at net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for shares will be closely related, but not identical, to the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time. However, given that shares can only be purchased and redeemed in Creation Units, and only to and from broker-dealers and large institutional investors that have entered into participation agreements (unlike shares of closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their net asset value), the Fund's investment adviser believes that large discounts or premiums to the net asset value of shares should not be sustained. During stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the market for the Fund's underlying portfolio holdings, which could in turn lead to differences between the market price of the Fund's shares and their net asset value and the bid/ask spread on the Fund's shares may widen.

Settlement Risk. Markets in different countries have different clearance and settlement procedures and in certain markets there have been times when settlements have been unable to keep pace with the volume of transactions. Delays in settlement may increase credit risk to the Fund, limit the ability of the Fund to reinvest the proceeds of a sale of securities, and potentially subject the Fund to penalties for its failure to deliver to on-purchasers of securities whose delivery to the Fund was delayed. Delays in the settlement of securities purchased by the Fund may limit the ability of the Fund to sell those securities at times and prices it considers desirable and may subject the Fund to losses and costs due to its own inability to settle with subsequent purchasers of the securities from it. The Fund may be required to borrow monies it had otherwise expected to receive in connection with the settlement of securities sold by it, in order to meet its obligations to others. Limits on the ability of the Fund to purchase or sell securities due to settlement delays could increase any variance between the Fund's performance and that of its index.

Small Capitalization Companies Risk. Small capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than large and mid capitalization companies as a result of several factors, including limited trading volumes, fewer products or financial resources, management inexperience and less publicly available information. Accordingly, such companies are generally subject to greater market risk than large and mid capitalization companies.

South Korea Risk. The Fund invests a significant portion of its assets in securities of South Korean issuers and is therefore subject to certain risks specifically associated with investments in the securities of South Korean issuers. Investments in South Korean issuers may subject the Fund to legal, regulatory, political, currency, security, and economic risks that are specific to South Korea. In addition, economic and political developments of South Korea's neighbors may have an adverse effect on the South Korean economy. This includes risks associated with the economic, market, regulatory, political, natural disasters and local risks of the Asia-Pacific region, which are heightened as compared to a fund with a more geographically diversified portfolio. The region has historically been highly dependent on global trade with nations (especially the United States and other Asian countries) taking strong roles in both the importing and exporting of goods, any reduction in this trading may have an adverse impact on the Fund's investments. In addition, South Korea has privatized, or has begun the process of privatizing, certain entities and industries. Newly privatized companies may face strong competition from government-sponsored competitors that have not been privatized. In some instances, investors in newly privatized entities have suffered losses due to the inability of the newly privatized entities to adjust quickly to a competitive environment or changing regulatory and legal standards or, in some cases, due to re-nationalization of such privatized entities. There is no assurance that similar losses will not recur. Lastly, North and South Korea each have substantial military capabilities, and historical tensions between the two present the ongoing risk of war. Recent incidents involving the North Korean military have heightened tensions between North and South Korea. Any outbreak of hostilities between the two countries could have a severe adverse effect on the South Korean economy and its securities markets.

Tax Risk. To qualify for the favorable tax treatment generally available to a regulated investment company (a "RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), the Fund must satisfy, among other requirements described in the SAI, certain diversification requirements. Given the concentration of the Fund's investments in a relatively small number of securities, it may not always be possible for the Fund to fully implement its investment strategy while satisfying these diversification requirements. The Fund's efforts to pursue its investment strategy may cause it inadvertently to fail to satisfy the diversification requirements. If the Fund were to fail to satisfy the diversification requirements, it could be eligible for relief provisions if the failure is due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures of the diversification requirements where the Fund corrects the failure within a specified period. If the Fund were to fail to qualify as a RIC for a tax year, and the relief provisions are not available, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income. In such case, its shareholders would be taxed as if they received ordinary dividends, although corporate shareholders could be eligible for the dividends received deduction (subject to certain limitations) and individuals may be able to benefit from the lower tax rates available to qualified dividend income. In addition, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying as a RIC.

Trading Issues Risk. Trading in Fund shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in Fund shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange's "circuit breaker" rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund's assets are small, the Fund does not have enough shareholders, or if the Fund is unable to proceed with creation and/or redemption orders.

Performance Information

The Fund is new and therefore has no performance history. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by comparing the Fund's return to a broad measure of market performance.

Investment Adviser

Exchange Traded Concepts, LLC serves as the investment adviser to the Fund.

Portfolio Managers

Andrew Serowik, Co-Chief Executive Officer and Portfolio Manager of the Adviser, has served as a portfolio manager of the Fund since 2026.

Gabriel Tan, Portfolio Manager of the Adviser, has served as a portfolio manager of the Fund since 2026.

Todd Alberico, Portfolio Manager of the Adviser, has served as a portfolio manager of the Fund since 2026.

Brian Cooper, Portfolio Manager of the Adviser, has served as a portfolio manager of the Fund since 2026.

Purchase and Sale of Fund Shares

The Fund issues and redeems shares on a continuous basis, at net asset value, only in large blocks of shares called "Creation Units." Individual shares of the Fund may only be purchased and sold on the secondary market through a broker-dealer. Since shares of the Fund trade on securities exchanges in the secondary market at their market price rather than their net asset value, the Fund's shares may trade at a price greater than (premium) or less than (discount) the Fund's net asset value. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) when buying or selling shares in the secondary market (the "bid-ask spread"). Recent information, including the Fund's net asset value, market price, premiums and discounts, bid-ask spreads and the median bid-ask spread for the Fund's most recent fiscal year, is available online at www.PlusETF.com.

Tax Information

Distributions made by the Fund may be taxable as ordinary income, qualified dividend income, or long-term capital gains, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or individual retirement account. In that case, you may be taxed when you take a distribution from such account, depending on the type of account, the circumstances of your distribution, and other factors.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Additional Principal Investment Strategies Information

The Fund seeks to provide investment results that, before fees and expenses, correspond generally to the total return performance of its index. The Fund may change its investment objective and index without shareholder approval. In addition, the Fund may change, without shareholder approval, upon 60 days' notice to shareholders, its policy to invest, under normal circumstances, at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in securities comprising the Index.

The Fund may lend portfolio securities to certain creditworthy borrowers. Securities lending involves exposure to certain risks, including operational risk (*i.e.*, the risk of losses resulting from problems in the settlement and accounting process), "gap" risk (*i.e.*, the risk of a mismatch between the return on cash collateral reinvestments and the fees the Fund has agreed to pay a borrower), and credit, legal, counterparty and market risk. In the event a borrower does not return the Fund's securities as agreed, the Fund may experience losses if the proceeds received from liquidating the collateral do not at least equal the value of the loaned security at the time the collateral is liquidated plus the transaction costs incurred in purchasing replacement securities.

The Fund generally will use a replication methodology, meaning the Fund will invest in all of the securities composing its index in proportion to the weightings in the index. However, the Fund may also use a representative sampling methodology under various circumstances, including when it may not be possible or practicable to purchase all of the securities in an index. Representative sampling is an indexing strategy that involves investing in a representative sample of an index's component securities that collectively has an investment profile similar to the relevant index. A number of factors may affect the Fund's ability to achieve a high correlation with its index, including the degree to which the Fund utilizes a sampling methodology, Fund expenses, rounding of share prices, the timing or magnitude of changes to the composition of an index, regulatory policies, and portfolio turnover rate. There can be no guarantee that the Fund will achieve a high degree of correlation.

The Fund may sell securities that are represented in an index or purchase securities not yet represented an index, in anticipation of their removal from or addition to that index. There may also be instances in which the Adviser may choose to overweight securities in the Fund's index, thus causing the Adviser to purchase or sell securities not in the index that the Adviser believes are appropriate to substitute for certain securities in the index or utilize various combinations of other available investment techniques in seeking to track that index. **The Fund will not take defensive positions.**

Additional Information about the Index

The Index was created on December 4, 2025. The Index is unmanaged and cannot be invested in directly. The Index is the exclusive property of the Index Provider and is administered by the Index Administrator and calculated by Solactive. Neither the Index Provider nor the Index Administrator is affiliated with Exchange Listed Funds Trust (the "Trust"), the Adviser, the Fund's administrator, custodian, transfer agent or distributor, or any of their respective affiliates. "PLUS" is a service mark(s) of the Index Provider or its affiliates and have been licensed for use for certain purposes by the Adviser. The Prospectus contains a detailed description of the relationship the Index Provider has with the Adviser.

Additions to and deletions from the Index may be made at any time based upon the Index methodology or due to changes in business, mergers, acquisitions, bankruptcies, suspensions, de-listings and spin-offs, or for other reasons as determined at the sole discretion of the Index Administrator. The Adviser and its affiliates were not involved in the creation of the Index and do not provide input to the Index Provider or the Index Administrator concerning the construction or eligibility criteria of the Index.

Additional Principal Risk Information

Risk is inherent in all investing. Investing in the Fund involves risk, including the risk that you may lose all or part of your investment. There can be no assurance that the Fund will meet its stated objectives. Before you invest, you should consider the following disclosure pertaining to the Principal Risks set forth above as well as additional Non-Principal Risks set forth below in this prospectus. The order of the below risk factors does not indicate the significance of any particular risk factor.

Principal Risks

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. A limited number of institutions act as authorized participants for the Fund. However, participants are not obligated to make a market in the Fund's shares or submit purchase and redemption orders for creation units. To the extent that these institutions exit the business, reduce their role or are unable to proceed with creation and/or redemption orders and no other authorized participant steps forward to create or redeem, the Fund's shares may trade at a premium or discount to the Fund's net asset value and possibly face delisting and the bid/ask spread on the Fund's shares may widen.

Cash Transactions Risk. The Fund may effect all or a portion of its creations and redemptions for cash rather than in-kind. As a result, an investment in the Fund may be less tax-efficient than an investment in an ETF that effects its creations and redemptions only in-kind. ETFs are able to make in-kind redemptions and avoid being taxed on gains on the distributed portfolio securities at the fund level. A fund that effects redemptions for cash may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. Any recognized gain on these sales by the Fund will generally cause the Fund to recognize a gain it might not otherwise have recognized, or to recognize such gain sooner than would otherwise be required if it were to distribute portfolio securities only in-kind. The Fund intends to distribute these gains to shareholders to avoid being taxed on this gain at the fund level and otherwise comply with the special tax rules that apply to it. This strategy may cause shareholders to be subject to tax on gains they would not otherwise be subject to, or at an earlier date than if they had made an investment in a different ETF. Moreover, cash transactions may have to be carried out over several days if the securities market is relatively illiquid and may involve considerable brokerage fees and taxes. These brokerage fees and taxes, which will be higher than if the Fund sold and redeemed its shares entirely in-kind, will be passed on to those purchasing and redeeming Creation Units in the form of creation and redemption transaction fees. In addition, these factors may result in wider spreads between the bid and the offered prices of the Fund's shares than for ETFs that distribute portfolio securities in-kind. The Fund's use of cash for creations and redemptions could also result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund's ability to achieve its investment objective.

Currency Exchange Rate Risk. The Fund invests in securities denominated in South Korean won. Investments denominated in non-U.S. currencies and investments in securities or derivatives that provide exposure to such currencies, currency exchange rates or interest rates are subject to non-U.S. currency risk. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Fund shares. Because the Fund's net asset value is determined on the basis of U.S. dollars, the U.S. dollar value of your investment in the Fund may go down if the value of the local currency of the non-U.S. markets in which the Fund invests depreciates against the U.S. dollar. This is true even if the local currency value of securities in the Fund's holdings goes up. Conversely, the U.S. dollar value of your investment in the Fund may go up if the value of the local currency appreciates against the U.S. dollar.

Current Market Conditions Risk. Current market conditions risk is the risk that a particular investment, or shares of the Fund in general, may fall in value due to current market conditions. As a means to fight inflation, the Federal Reserve and certain foreign central banks have previously raised interest rates. The Federal Reserve has recently lowered interest rates and may continue to do so in the future. U.S. regulators have proposed several changes to market and issuer regulations which would directly impact the Fund, and any regulatory changes could adversely impact the Fund's ability to achieve its investment strategies or make certain investments. Recent and potential future bank failures could result in disruption to the broader banking industry or markets generally and reduce confidence in financial institutions and the economy as a whole, which may also heighten market volatility and reduce liquidity. The ongoing adversarial political climate in the United States, as well as political and diplomatic events both domestic and abroad, have and may continue to have an adverse impact the U.S. regulatory landscape, markets and investor behavior, which could have a negative impact on the Fund's investments and operations. Other unexpected political, regulatory and diplomatic events within the U.S. and abroad may affect investor and consumer confidence and may adversely impact financial markets and the broader economy. For example, ongoing armed conflicts between Russia and Ukraine in Europe and conflicts in the Middle East, have caused and could continue to cause significant market disruptions and volatility within the markets in Russia, Europe, the Middle East and the United States. The hostilities and sanctions resulting from those hostilities have and could continue to have a significant impact on certain Fund investments as well as Fund performance and liquidity. The economies of the United States and its trading partners, as well as the financial markets generally, may be adversely impacted by trade disputes and other matters. For example, the United States has imposed trade barriers and restrictions on China. In addition, the Chinese government is engaged in a longstanding dispute with Taiwan, continually threatening an invasion. If the political climate between the United States and China does not improve or continues to deteriorate, if China were to attempt invading Taiwan, or if other geopolitical conflicts develop or worsen, economies, markets and individual securities may be adversely affected, and the value of the Fund's assets may go down. The COVID-19 global pandemic, or any future public health crisis, and the ensuing policies enacted by governments and central banks have caused and may continue to cause significant volatility and uncertainty in global financial markets, negatively impacting global growth prospects. While vaccines have been developed, there is no guarantee that vaccines will be effective against emerging future variants of the disease. As this global pandemic illustrated, such events may affect certain geographic regions, countries, sectors and industries more significantly than others. Advancements in technology may also adversely impact markets and the overall performance of the Fund. For instance, the economy may be significantly impacted by the advanced development and increased regulation of artificial intelligence. These events, and any other future events, may adversely affect the prices and liquidity of the Fund's portfolio investments and could result in disruptions in the trading markets.

Custody Risk. Less developed securities markets, such as South Korea, are more likely to experience problems with the clearing and settling of trades, as well as the holding of securities by local banks, agents and depositories.

Cybersecurity Risk. The Fund is susceptible to operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. These risks typically are not covered by insurance. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber incidents include, but are not limited to, gaining unauthorized access to digital systems (*e.g.*, through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (*i.e.*, efforts to make network services unavailable to intended users). Cyber security failures by or breaches of the systems of the Adviser, distributor and other service providers (including, but not limited to, sub-advisers, index providers, fund accountants, custodians, transfer agents and administrators), market makers, authorized participants or the issuers of securities in which the Fund invests, have the ability to cause disruptions and impact business operations, potentially resulting in: financial losses; interference with the Fund's ability to calculate its net asset value; disclosure of confidential trading information; impediments to trading; submission of erroneous trades or erroneous creation or redemption orders; the inability of the Fund or its service providers to transact business; violations of applicable privacy and other laws; regulatory fines penalties, reputational damage, reimbursement or other compensation costs; or additional compliance costs. Substantial costs may be incurred by the Fund in order to resolve or prevent cyber incidents in the future. While the Fund has established business continuity plans in the event of, and risk management systems to prevent, such cyber attacks, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified and that prevention and remediation efforts will not be successful. Furthermore, the Fund cannot control the cyber security plans and systems put in place by service providers to the Fund, issuers in which the Fund invest, market makers or authorized participants. However, there is no guarantee that such efforts will succeed, and the Fund and its shareholders could be negatively impacted as a result.

Equity Securities Risk. The value of the Fund's shares will fluctuate with changes in the value of the equity securities in which it invests. Equity securities prices fluctuate for several reasons, including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant equity market, such as market volatility, or when political or economic events affecting the issuers occur. Common stock prices may be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase. Equity securities may decline significantly in price over short or extended periods of time, and such declines may occur in the equity market as a whole, or they may occur in only a particular country, company, industry or sector of the market. Additionally, holders of an issuer's common stock may be subject to greater risks than holders of its preferred stock and debt securities because common stockholders' claims are subordinated to those of holders of preferred stocks and debt securities upon the bankruptcy of an issuer.

Foreign Securities Risk. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to expropriation, nationalization or adverse political or economic developments. Foreign securities may have relatively low market liquidity and decreased publicly available information about issuers. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. Non-U.S. issuers may also be subject to inconsistent and potentially less stringent accounting, auditing, financial reporting and investor protection standards than U.S. issuers. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments. In addition, where all or a portion of the Fund's portfolio holdings trade in markets that are closed when the Fund's market is open, there may be valuation differences that could lead to differences between the Fund's market price and the value of the Fund's portfolio holdings.

Geographic Investment Risk. To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. The country or region in which the Fund invests may have experienced security concerns, war or threats of war and aggression, terrorism, economic uncertainty, natural and environmental disasters and/or systemic market dislocations that have led, and in the future may lead, to increased short-term market volatility, each of which may impact the Fund's investments.

Index Concentration Risk. The Fund will be concentrated in an industry or a group of industries to the extent that the Index is so concentrated. To the extent that the Fund invests a significant percentage of its assets in a single asset class or the securities of issuers within the same country, state, region, industry or sector, an adverse economic, business or political development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. A significant exposure makes the Fund more susceptible to any single occurrence and may subject the Fund to greater market risk than a fund that is more broadly diversified. There may be instances in which the Index, for a variety of reasons including changes in the prices of individual securities held by the Fund, has a larger exposure to a small number of stocks or a single stock relative to the rest of the stocks in the Index. Under such circumstances, the Fund will not deviate from the Index except in rare circumstances or in an immaterial way and therefore the Fund's returns would be more greatly influenced by the returns of the stock(s) with the larger exposure.

Index Provider Risk. There is no assurance that an Index Provider, or any agents that act on its behalf, will compile an Index accurately, or that an Index will be determined, maintained, constructed, reconstituted, rebalanced, composed, calculated or disseminated accurately. An Index Provider and its agents do not provide any representation or warranty in relation to the quality, accuracy or completeness of data in an Index, and do not guarantee that an Index will be calculated in accordance with its stated methodology. The Adviser's mandate as described in this prospectus is to manage the Fund consistently with the Index provided by an Index Provider. The Adviser relies upon the Index Provider and its agents to accurately compile, maintain, construct, reconstitute, rebalance, compose, calculate and disseminate an Index accurately. Therefore, losses or costs associated with any Index Provider or agent errors generally will be borne by the Fund and its shareholders. To correct any such error, an Index Provider or its agents may carry out an unscheduled rebalance of an Index or other modification of Index constituents or weightings. When the Fund in turn rebalances its portfolio, any transaction costs and market exposure arising from such portfolio rebalancing will be borne by the Fund and its shareholders. Unscheduled rebalances also expose the Fund to additional tracking error risk. Errors in respect of the quality, accuracy and completeness of the data used to compile an Index may occur from time to time and may not be identified and corrected by an Index Provider for a period of time or at all, particularly where an Index is less commonly used as a benchmark by funds or advisors. For example, during a period where an Index contains incorrect constituents, the Fund tracking the Index would have market exposure to such constituents and would be underexposed to the Index's other constituents. Such errors may negatively impact the Fund and its shareholders. An Index Provider and its agents rely on various sources of information to assess the criteria of issuers included in an Index, including information that may be based on assumptions and estimates. Neither the Fund nor the Adviser can offer assurances that an Index's calculation methodology or sources of information will provide an accurate assessment of included issuers. Unusual market conditions may cause an Index Provider to postpone a scheduled rebalance, which could cause an Index to vary from its normal or expected composition. The postponement of a scheduled rebalance in a time of market volatility could mean that constituents that would otherwise be removed at rebalance due to changes in market capitalizations, issuer credit ratings, or other reasons may remain, causing the performance and constituents of an Index to vary from those expected under normal conditions. Apart from scheduled rebalances, an Index Provider or its agents may carry out additional ad hoc rebalances to an Index due to unusual market conditions or in order, for example, to correct an error in the selection of index constituents.

Industry Concentration Risk. Because the Fund's assets will be concentrated in an industry or group of industries to the extent the Index concentrates in a particular industry or group of industries, the Fund is subject to loss due to adverse occurrences that may affect that industry or group of industries. The list below is not a comprehensive list of the industries to which the Fund may have exposure over time and should not be relied on as such. As of April 7, 2026, the Index was concentrated in the AI Semiconductor Industry, as defined by AICS.

> *AI Semiconductor Industry Risk.* Semiconductor companies face intense competition, both domestically and internationally, and such competition may have an adverse effect on profit margins. Semiconductor companies may have limited product lines, markets, financial resources or personnel. Semiconductor companies' supply chain and operations are dependent on the availability of materials that meet exacting standards and the use of third parties to provide components and services. Semiconductor companies may rely on a limited number of suppliers, or upon suppliers in a single location, for certain materials, equipment or tools. Finding and qualifying alternate or additional suppliers can be a lengthy process that can cause production delays or impose unforeseen costs, and such alternatives may not be available at all. Production can be disrupted by the unavailability of resources, such as water, silicon, electricity, gases and other materials. Suppliers may also increase prices or encounter cybersecurity or other issues that can disrupt production or increase production costs. The products of semiconductor companies may face obsolescence due to rapid technological developments and frequent new product introduction, unpredictable changes in growth rates and competition for the services of qualified personnel. Capital equipment expenditures could be substantial, and equipment generally suffers from rapid obsolescence. Companies in the semiconductor industry are heavily dependent on patent and intellectual property rights. The loss or impairment of these rights would adversely affect the profitability of these companies.

International Closed Market Trading Risk. Because securities held by the Fund trade on non-U.S. exchanges that are closed when the Fund's primary listing exchange is open, there are likely to be deviations between the current price of an underlying security and the last quoted price for the underlying security (i.e., the Fund's quote from the closed foreign market) used for purposes of calculating the Fund's net asset value, resulting in premiums or discounts to the Fund's net asset value that may be greater than those experienced by other exchange-traded funds. In addition, shareholders may not be able to purchase and sell shares of the Fund on the listing exchange for the Fund, on days when the net asset value of the Fund could be significantly affected by events in the relevant foreign markets.

Investable Universe of Companies Risk. The investable universe of companies in which the Fund may invest may be limited. If a company no longer meets the Index Provider's criteria for inclusion in the Underlying Index, the Fund may need to reduce or eliminate its holdings in that company. The reduction or elimination of the Fund's holdings in the company may have an adverse impact on the liquidity of the Fund's overall portfolio holdings and on Fund performance.

Manufacturing Companies Risk. Companies involved in manufacturing or manufacturing-related activities face a number of risks, including supply chain and distribution disruptions, business interruptions, obsolescence, third-party vendor risks, cyber attacks, trade disputes, product recalls, liability claims, scarcity of materials or parts, excess capacity, changes in consumer preferences, and volatility in commodity prices and currencies. The performance of such companies may also be affected by technological developments, labor relations, legislative and regulatory changes, government spending policies, and changes in domestic and international economies.

Market Maker Risk. The Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares due to a limited number of market markers. Decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. The Fund may rely on a small number of third-party market makers to provide a market for the purchase and sale of shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's net asset value and the price at which the Fund's shares are trading on the Exchange, which could result in a decrease in value of the Fund's shares. This reduced effectiveness could result in Fund shares trading at a discount to net asset value and also in greater than normal intraday bid-ask spreads for Fund shares.

*Market Risk***.** Market risk is the risk that a particular security, or shares of the Fund in general, may fall in value. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments. In addition, local, regional or global events such as war, acts of terrorism, market manipulation, government defaults, government shutdowns, regulatory actions, political changes, diplomatic developments, the imposition of sanctions and other similar measures, spread of infectious diseases or other public health issues, recessions, natural disasters, or other events could have a significant negative impact on the Fund and its investments. Any of such circumstances could have a materially negative impact on the value of the Fund's shares, the liquidity of an investment, and may result in increased market volatility. During any such events, the Fund's shares may trade at increased premiums or discounts to their net asset value, the bid/ask spread on the Fund's shares may widen and the returns on investment may fluctuate.

Mid-Capitalization Companies Risk. Mid capitalization companies may be more vulnerable to adverse general market or economic developments and thus may experience greater price volatility than more established large capitalization companies. Securities of mid capitalization companies may also be less liquid than securities of large capitalization companies and may have more limited trading volumes. Accordingly, such companies are generally subject to greater market risk than larger, more established companies.

New Fund Risk. The Fund is new and currently has fewer assets than larger funds, and like other new funds, large inflows and outflows may impact the Fund's market exposure for limited periods of time. This impact may be positive or negative, depending on the direction of market movement during the period affected. Additionally, because the Fund has fewer assets than larger funds over which to spread its fixed costs, its expense levels on a percentage basis will be higher than that of a larger Fund.

Non-Correlation Risk. The Fund's return may not match the return of the Index for a number of reasons. The Fund incurs operating expenses not applicable to its Index and may incur costs in buying and selling securities, especially when rebalancing the Fund's portfolio holdings to reflect changes in the composition of the Index. In addition, the Fund's portfolio holdings may not exactly replicate the securities included in its Index or the ratios between the securities included in the Index.

Non-Diversification Risk. As a non-diversified investment company under the 1940 Act, the Fund may hold a smaller number of portfolio securities than many other funds and may be more sensitive to any single economic, business, political or regulatory occurrence than a diversified fund. To the extent the Fund invests in a relatively small number of issuers, a decline in the market value of a particular security held by the Fund may affect its value more than if it invested in a larger number of issuers. The value of the Fund's shares may be more volatile than the values of shares of more diversified funds.

Operational Risk. The Fund is subject to risks arising from various operational factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund relies on third-parties for a range of services, including custody. Any delay or failure relating to engaging or maintaining such service providers may affect the Fund's ability to meet its investment objective. Although the Fund and the Fund's investment adviser seek to reduce these operational risks through controls and procedures, there is no way to completely protect against such risks.

Passive Investment Risk. The Fund invests in securities included in or representative of an Index regardless of investment merit. The Fund generally will not attempt to take defensive positions in declining markets. In the event that an Index is no longer calculated, the corresponding Index license is terminated or the identity or character of an Index is materially changed, the applicable Fund will seek to engage a replacement index. The Fund will be concentrated in an industry or a group of industries to the extent that the Index is so concentrated. To the extent that the Fund invests a significant percentage of its assets in a single asset class or the securities of issuers within the same country, state, region, industry or sector, an adverse economic, business or political development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. To the extent circumstances evolve in between reconstitutions, the Index may include, and the Fund may therefore hold for a period of time, securities of companies that do not align with the Index's objective and/or criteria. When there are changes made to the component securities of the Index and the Fund in turn makes similar changes to its portfolio, any transaction costs and market exposure arising from such portfolio changes will be borne directly by the Fund and its shareholders. The Fund may recognize gains as a result of rebalancing or reconstituting its securities holdings to reflect changes in the securities included in the Index. The Fund also may be required to distribute any such gains to its shareholders to avoid adverse U.S. federal income tax consequences.

Premium/Discount Risk. The market price of the Fund's shares will generally fluctuate in accordance with changes in the Fund's net asset value as well as the relative supply of and demand for shares on the Exchange. The Adviser cannot predict whether shares will trade below, at or above their net asset value because the shares trade on the Exchange at market prices and not at net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for shares will be closely related, but not identical, to the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time. However, given that shares can only be purchased and redeemed in Creation Units, and only to and from broker-dealers and large institutional investors that have entered into participation agreements (unlike shares of closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their net asset value), the Adviser believes that large discounts or premiums to the net asset value of shares should not be sustained absent disruptions to the creation and redemption mechanism, extreme market volatility or potential lack of authorized participants. During stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the market for the Fund's underlying portfolio holdings, which could in turn lead to differences between the market price of the Fund's shares and their net asset value and the bid/ask spread on the Fund's shares may widen.

Settlement Risk. Markets in different countries have different clearance and settlement procedures and in certain markets there have been times when settlements have been unable to keep pace with the volume of transactions. Delays in settlement may increase credit risk to the Fund, limit the ability of the Fund to reinvest the proceeds of a sale of securities, and potentially subject the Fund to penalties for its failure to deliver to on-purchasers of securities whose delivery to the Fund was delayed. Delays in the settlement of securities purchased by the Fund may limit the ability of the Fund to sell those securities at times and prices it considers desirable, and may subject the Fund to losses and costs due to its own inability to settle with subsequent purchasers of the securities from it. The Fund may be required to borrow monies it had otherwise expected to receive in connection with the settlement of securities sold by it, in order to meet its obligations to others. Limits on the ability of the Fund to purchase or sell securities due to settlement delays could increase any variance between the Fund's performance and that of the Index.

Small Capitalization Companies Risk. Small capitalization companies may be more vulnerable to adverse general market or economic developments, and their securities may be less liquid and may experience greater price volatility than large and mid capitalization companies as a result of several factors, including limited trading volumes, fewer products or financial resources, management inexperience and less publicly available information. Accordingly, such companies are generally subject to greater market risk than large and mid capitalization companies.

South Korea Risk. The Fund invests a significant portion of its assets in securities of South Korean issuers and is therefore subject to certain risks specifically associated with investments in the securities of South Korean issuers. Investments in South Korean issuers may subject the Fund to legal, regulatory, political, currency, security, and economic risks that are specific to South Korea. In addition, economic and political developments of South Korea's neighbors may have an adverse effect on the South Korean economy. This includes risks associated with the economic, market, regulatory, political, natural disasters and local risks of the Asia-Pacific region, which are heightened as compared to a fund with a more geographically diversified portfolio. The region has historically been highly dependent on global trade with nations (especially the United States and other Asian countries) taking strong roles in both the importing and exporting of goods, any reduction in this trading may have an adverse impact on the Fund's investments. In addition, South Korea has privatized, or has begun the process of privatizing, certain entities and industries. Newly privatized companies may face strong competition from government-sponsored competitors that have not been privatized. In some instances, investors in newly privatized entities have suffered losses due to the inability of the newly privatized entities to adjust quickly to a competitive environment or changing regulatory and legal standards or, in some cases, due to re-nationalization of such privatized entities. There is no assurance that similar losses will not recur. Lastly, North and South Korea each have substantial military capabilities, and historical tensions between the two present the ongoing risk of war. Recent incidents involving the North Korean military have heightened tensions between North and South Korea. Any outbreak of hostilities between the two countries could have a severe adverse effect on the South Korean economy and its securities markets.

Tax Risk. To qualify for the favorable tax treatment generally available to a RIC under Subchapter M of the Internal Revenue Code, the Fund must satisfy, among other requirements described in the SAI, certain diversification requirements. Given the concentration of the Fund's investments in a relatively small number of securities, it may not always be possible for the Fund to fully implement its investment strategy while satisfying these diversification requirements. The Fund's efforts to pursue its investment strategy may cause it inadvertently to fail to satisfy the diversification requirements. If the Fund were to fail to satisfy the diversification requirements, it could be eligible for relief provisions if the failure is due to reasonable cause and not willful neglect and if a penalty tax is paid with respect to each failure to satisfy the applicable requirements. Additionally, relief is provided for certain de minimis failures of the diversification requirements where the Fund corrects the failure within a specified period. If the Fund were to fail to qualify as a RIC for a tax year, and the relief provisions are not available, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income. In such case, its shareholders would be taxed as if they received ordinary dividends, although corporate shareholders could be eligible for the dividends received deduction (subject to certain limitations) and individuals may be able to benefit from the lower tax rates available to qualified dividend income. In addition, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying as a RIC.

Trading Issues Risk. Trading in Fund shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in Fund shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange's "circuit breaker" rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund's assets are small, the Fund does not have enough shareholders, or if the Fund is unable to proceed with creation and/or redemption orders.

Non-Principal Risks

*Failure to Qualify as a Regulated Investment Company Risk***.** If, in any year, the Fund fails to qualify as a regulated investment company under the applicable tax laws, the Fund would be taxed as an ordinary corporation. In such circumstances, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest and make substantial distributions before requalifying as a regulated investment company that is accorded special tax treatment.

Intellectual Property Risk. The Fund relies on a license and related sublicense that permits the Fund to use its Index and associated trade names, trademarks and service marks (the "Intellectual Property") in connection with the Fund's name and investment strategies. Such license and related sublicense may be terminated by the Index Provider, and, as a result, the Fund may lose its ability to use the Intellectual Property. There is also no guarantee that the Index Provider has all rights to license the Intellectual Property for use by the Fund. Accordingly, in the event the license is terminated or the Index Provider does not have rights to license the Intellectual Property, it may have a significant effect on the operation of the Fund.

Issuer Specific Changes Risk. The value of an individual security or particular type of security can be more volatile than the market as a whole and can perform differently from the value of the market as a whole.

Legislation/Litigation Risk. From time to time, various legislative initiatives are proposed in the United States and abroad, which may have a negative impact on certain companies in which the Fund invests. In addition, litigation regarding any of the issuers of the securities owned by the Fund, or industries represented by these issuers, may negatively impact the value of the securities. Such legislation or litigation may cause the Fund to lose value or may result in higher portfolio turnover if the Adviser determines to sell such a holding.

Portfolio Holdings

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's Statement of Additional Information (the "SAI").

Fund Management

Adviser

Exchange Traded Concepts, LLC, an Oklahoma limited liability company, is located at 10900 Hefner Pointe Drive, Suite 400, Oklahoma City, Oklahoma 73120, its primary place of business, and 295 Madison Avenue, New York, New York 10017. The Adviser was formed in 2009 and provides investment advisory services to exchange-traded funds.

Under an investment advisory agreement between the Trust, on behalf of the Fund, and the Adviser, the Adviser provides investment advisory services to the Fund. The Adviser is responsible for, among other things, the selection and ongoing monitoring of the securities in the Fund's portfolio, trading portfolio securities on behalf of the Fund, selecting broker-dealers to execute purchase and sale transactions, subject to the oversight of the Board, and certain other services necessary for the management of the Fund. For the services it provides to the Fund, the Adviser is entitled to a fee calculated daily and paid monthly at an annual rate of 0.65% of the average daily net assets of the Fund.

ETC Platform Services, LLC ("ETC Platform Services"), a direct wholly-owned subsidiary of the Adviser, administers the Fund's business affairs and provides office facilities and equipment, certain clerical, bookkeeping and administrative services, paying agent services under the Fund's unitary fee arrangement (as described below), and its officers and employees to serve as officers or Trustees of the Trust. ETC Platform Services also arranges for transfer agency, custody, fund administration and accounting, and other non-distribution related services necessary for the Fund to operate. For the services it provides to the Fund, ETC Platform Services is paid a fee calculated daily and paid monthly based on a percentage of the Fund's average daily net assets.

Under the investment advisory agreement, the Adviser has agreed to pay all expenses incurred by the Fund (including the fee charged by ETC Platform Services), except for the advisory fee, interest, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, and distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act ("Excluded Expenses").

Hanwha Asset Management Co., Ltd. is the Index Provider to the Fund and acts as the Fund's sponsor. The Adviser has entered into an arrangement with the Index Provider pursuant to which the Adviser is permitted to use the Index. The Adviser is sub-licensing rights to the Index to the Fund at no charge. In connection with an arrangement between the Adviser, ETC Platform Services and the Index Provider, the Index Provider has agreed to assume the obligation of the Adviser to pay all expenses of the Fund (except Excluded Expenses) and, to the extent applicable, pay the Adviser a minimum fee. For its services, the Index Provider is entitled to a fee from the Adviser, which is calculated daily and paid monthly, based on a percentage of the average daily net assets of the Fund. The Index Provider does not make investment decisions, provide investment advice, or otherwise act in the capacity of an investment adviser to any Fund.

Pursuant to an SEC exemptive order and subject to the conditions of that order, the Adviser may, with Board approval but without shareholder approval, change or select new sub-advisers, materially amend the terms of an agreement with a sub-adviser (including an increase in its fee), or continue the employment of a sub-adviser after an event that would otherwise cause the automatic termination of services. Shareholders will be notified of any such changes.

A discussion regarding the basis for the Board's approval of the investment advisory agreement with the Adviser will be available in the Fund's first Form N-CSR filing.

Portfolio Managers

Andrew Serowik joined the Adviser in May 2018 as a Portfolio Manager from Goldman Sachs and was promoted to Co-Chief Executive Officer and Portfolio Manager in September 2025. He began his career at Spear, Leeds & Kellogg ("SLK"), continuing with Goldman after its acquisition of SLK in September 2000. During his career of more than 18 years at the combined companies, he held various roles, including managing the global Quant ETF Strats team and One Delta ETF Strats. He designed and developed systems for portfolio risk calculation, algorithmic ETF trading, and execution monitoring, with experience across all asset classes. He graduated from the University of Michigan with a Bachelor of Business Administration degree in finance.

Gabriel Tan joined the Adviser in May 2019 as an Associate Portfolio Manager and was promoted to Portfolio Manager in December 2020. He began his career at UBS and BBR Partners where he worked as a financial planning analyst and a portfolio strategist for over four years. During his time there, he developed comprehensive wealth management solutions focused on portfolio optimization, trust and estate planning, and tax planning. Mr. Tan graduated from the University of North Carolina at Chapel Hill with a Bachelor of Science in Business Administration with a concentration in Investments, a Bachelor of Arts in Economics, and a Minor in Chinese.

Mr. Alberico joined the Adviser in November 2020 as a Portfolio Manager. From 2005 to 2011, he worked on the ETF trading and portfolio risk management team at Goldman Sachs. He subsequently held roles at Cantor Fitzgerald (from 2011 to 2013) and Virtu Financial (from 2013 to 2020). Mr. Alberico has worked on several different facets of ETF trading, from lead market-making and electronic trading to customer facing institutional business developing models for block trading as well as transitional trades. Mr. Alberico graduated from St. John's University in NY with a Bachelor of Science degree in Finance.

Mr. Cooper joined the Adviser as a Portfolio Manager in November 2021. Previously, Mr. Cooper had roles in trade operations for Constellation Advisers from March 2017 until April 2018 and for QFR Capital Management from April 2018 until July 2020 and in the middle office derivatives group of Elliot Capital Management from September 2020 until November 2021. Prior to these roles, he spent 14 years working in various operational roles for Falcon Management Corporation, a global macro family office, gaining exposure to a variety of asset classes with a focus on operations, accounting, and technology. Mr. Cooper graduated from Pennsylvania State University in 2002 with a Bachelor of Science in Finance and a minor in Business Law.

The SAI provides additional information about the portfolio managers' compensation, other accounts managed, and ownership of Fund shares.

Buying and Selling Fund Shares

General

Shares of the Fund are listed for trading on the Exchange. When you buy or sell the Fund's shares on the secondary market, you will pay or receive the market price. You may incur customary brokerage commissions and charges and may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. The shares of the Fund will trade on the Exchange at prices that may differ to varying degrees from the daily NAV of such shares. A business day with respect to the Fund is any day on which the Exchange is open for business. The Exchange is generally open Monday through Friday and is closed on weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

NAV per share for the Fund is computed by dividing the value of the net assets of that Fund (*i.e.*, the value of its total assets less total liabilities) by its total number of shares outstanding. Expenses and fees, including management and distribution fees, if any, are accrued daily and taken into account for purposes of determining NAV. NAV is determined each business day, normally as of the close of regular trading of the New York Stock Exchange (ordinarily 4:00 p.m., Eastern time).

When determining NAV, the value of the Fund's portfolio investments is determined pursuant to the Trust's valuation policy and the Adviser's fair valuation policy and procedures. In general, the value of the Fund's portfolio investments is based on market prices of securities, which generally means a valuation obtained from an exchange or other market (or based on a price quotation or other equivalent indication of the value supplied by an exchange or other market) or a valuation obtained from an independent pricing service. Pursuant to Rule 2a-5 under the 1940 Act, the Adviser has been designated by the Board as the valuation designee with responsibility for fair valuation subject to oversight by the Board. If an investment's market price is not readily available or does not otherwise accurately reflect the fair value of the security, pursuant to the Trust's valuation policy, the investment will be fair valued in accordance with the Adviser's fair valuation policy and procedures, which were approved by the Board. An investment may be fair valued in a variety of circumstances, including but not limited to, situations when the value of a security in the Fund's portfolio has been materially affected by events occurring after the close of the market on which the security is principally traded but prior to the close of the Exchange (such as in the case of a corporate action or other news that may materially affect the price of a security) or trading in a security has been suspended or halted. Accordingly, the Fund's NAV may reflect certain portfolio securities' fair values rather than their market prices.

Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security will materially differ from the value that could be realized upon the sale of the security.

Frequent Purchases and Redemptions of Fund Shares

The Fund does not impose any restrictions on the frequency of purchases and redemptions of Creation Units; however, the Fund reserves the right to reject or limit purchases at any time as described in the SAI. When considering that no restriction or policy was necessary, the Board evaluated the risks posed by arbitrage and market timing activities, such as whether frequent purchases and redemptions would interfere with the efficient implementation of the Fund's investment strategy, or whether they would cause the Fund to experience increased transaction costs. The Board considered that, unlike traditional mutual funds, shares of the Fund are issued and redeemed only in large quantities of shares known as Creation Units available only from the Fund directly to Authorized Participants, and that most trading in the Fund occurs on the Exchange at prevailing market prices and does not involve the Fund directly. Given this structure, the Board determined that it is unlikely that trading due to arbitrage opportunities or market timing by shareholders would result in negative impact to the Fund or its shareholders. In addition, frequent trading of the Fund's shares by Authorized Participants and arbitrageurs is critical to ensuring that the market price remains at or close to NAV.

Distribution and Service Plan

The Fund has adopted a Distribution and Service Plan in accordance with Rule 12b-1 under the 1940 Act pursuant to which payments of up to 0.25% of the Fund's average daily net assets may be made for the sale and distribution of its shares. No payments pursuant to the Distribution and Service Plan will be made during the twelve (12) month period from the date of this Prospectus. Thereafter, 12b-1 fees may only be imposed after approval by the Board. Because these fees, if imposed, would be paid out of the Fund's assets on an ongoing basis, if payments are made in the future, these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

Dividends, Distributions and Taxes

Fund Distributions

The Fund pays out dividends from its net investment income annually and distributes its net capital gains, if any, to investors at least annually.

Dividend Reinvestment Service

Brokers may make available to their customers who own shares of the Fund the Depository Trust Company book-entry dividend reinvestment service. If this service is available and used, dividend distributions of both income and capital gains will automatically be reinvested in additional whole shares of the applicable Fund purchased on the secondary market. Without this service, investors would receive their distributions in cash. To determine whether the dividend reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker. Brokers may require the Fund's shareholders to adhere to specific procedures and timetables.

Tax Information

The following is a summary of certain important U.S. federal income tax issues that affect the Fund and its shareholders. The summary is based on current tax laws, which may be changed by legislative, judicial or administrative action. You should not consider this summary to be a comprehensive explanation of the tax treatment of the Fund, or the tax consequences of an investment in the Fund. More information about taxes is located in the SAI. You are urged to consult your tax adviser regarding specific questions as to federal, state and local income taxes.

Tax Status of the Fund

The Fund has elected and intends to qualify each year for the special tax treatment afforded to a RIC under the Internal Revenue Code. As long as the Fund maintains its qualification for treatment as a RIC and meets certain minimum distribution requirements, then it generally is not subject to federal income tax on the earnings it timely distributes to its shareholders. However, if the Fund fails to qualify as a RIC or to meet minimum distribution requirements it would result in fund level taxation (if certain relief provisions were not available) and consequently a reduction in income available for distribution to shareholders.

Unless you are a tax-exempt entity or your investment in Fund shares is made through a tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when the Fund makes distributions, you sell Fund shares, and you purchase or redeem Creation Units (Authorized Participants only).

Tax Status of Distributions

- The Fund intends to distribute for each year substantially all of its net investment income and net capital gains income.
- Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional shares of the Fund.
- The income dividends you receive from the Fund will be generally taxed as either ordinary income or "qualified dividend income." Dividends that are reported by the Fund as qualified dividend income are generally taxable to non-corporate shareholders at a maximum tax rate currently set at 20% (lower rates apply to individuals in lower tax brackets). Qualified dividend income generally is income derived from dividends paid to the Fund by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. South Korea has a comprehensive income tax treaty with the United States that permits corporations incorporated therein to be treated as qualified foreign corporations that are able to distribute dividends eligible to be treated as qualified dividend income. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. For such dividends to be taxed as qualified dividend income to a non-corporate shareholder, the Fund must satisfy certain holding period requirements with respect to the underlying stock, and the non-corporate shareholder must satisfy holding period requirements with respect to his or her ownership of the Fund's shares. Holding periods may be suspended for these purposes for stock that is hedged.

- Taxes on distributions of capital gains (if any) may be determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned their shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses.

- Distributions from the Fund's short-term capital gains are generally taxable as ordinary income. Distributions from the Fund's net capital gain (the excess of the Fund's net long-term capital gains over its net short-term capital losses) are taxable as long-term capital gains regardless of how long you have owned your shares of the Fund. For non-corporate shareholders, long-term capital gains are generally taxable at tax rates of up to 20% (lower rates apply to individuals in lower tax brackets).

- Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. Certain of the Fund's investment strategies may limit their ability to make distributions eligible for the dividends received deduction for corporate shareholders.

- In general, your distributions are subject to federal income tax for the year in which they are paid. However, distributions paid in January but declared by the Fund in October, November or December of the previous year payable to shareholders of record in such a month may be taxable to you in the previous year.

- You should note that if you purchase shares of the Fund just before a distribution, the purchase price would reflect the amount of the upcoming distribution. In this case, you would be taxed on the entire amount of the distribution received, even though, as an economic matter, the distribution simply constitutes a return of your investment. This is known as "buying a dividend" and should be avoided by taxable investors.

- The Fund (or your broker) will inform you of the amount of your ordinary income dividends, qualified dividend income, and net capital gain distributions shortly after the close of each calendar year.

Tax Status of Share Transactions

Each sale of Fund shares or redemption of Creation Units will generally be a taxable event. In general, any gain or loss realized upon a taxable disposition of shares by a shareholder will be treated as capital gain or loss if the shares are capital assets in the shareholder's hands and will be long-term capital gain or loss if the shares have been held for more than 12 months, and short-term capital gain or loss if the shares are held for 12 months or less. Any capital loss on the sale of shares of the Fund held for six months or less is treated as long-term capital loss to the extent distributions of long-term capital gain were paid (or treated as paid) with respect to such shares. Any loss realized on a sale will be disallowed to the extent shares of the Fund are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the sale of Fund shares. The ability to deduct capital losses may be limited.

An Authorized Participant who exchanges securities for Creation Units generally will recognize gain or loss from the exchange. The gain or loss will be equal to the difference between (i) the market value of the Creation Units at the time of the exchange plus any cash received in the exchange and (ii) the exchanger's aggregate basis in the securities surrendered plus any cash paid for the Creation Units. An Authorized Participant who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between (i) the exchanger's basis in the Creation Units and (ii) the aggregate market value of the securities and the amount of cash received. The IRS, however, may assert that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing "wash sales" (for a person who does not mark-to-market their holdings), or on the basis that there has been no significant change in economic position. Authorized Participants should consult their own tax advisor with respect to whether wash sales rules apply and when a loss might be deductible.

The Fund may include cash when paying the redemption price for Creation Units in addition to, or in place of, the delivery of a basket of securities. The Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment than if the in-kind redemption process was used.

Foreign Taxes

To the extent the Fund invests in foreign securities, it may be subject to foreign withholding taxes with respect to dividends or interest the Fund receives from sources in foreign countries. If more than 50% of the total assets of the Fund consist of foreign securities, the Fund will be eligible to elect to treat some of those taxes as a distribution to shareholders, which would allow shareholders to offset some of their U.S. federal income tax. The Fund (or your broker) will notify you if it makes such an election and provide you with the information necessary to reflect foreign taxes paid on your income tax return.

Foreign tax credits, if any, received by the Fund as a result of an investment in another RIC (including an ETF which is taxable as a RIC) will not be passed through to you unless the Fund qualifies as a "qualified fund-of-funds" under the Internal Revenue Code. If the Fund is a "qualified fund-of-funds" it will be eligible to file an election with the IRS that will enable the Fund to pass along these foreign tax credits to its shareholders. The Fund will be treated as a "qualified fund-of-funds" under the Internal Revenue Code if at least 50% of the value of the Fund's total assets (at the close of each quarter of the Fund's taxable year) is represented by interests in other RICs.

Net Investment Income Tax

U.S. individuals with income exceeding $200,000 ($250,000 if married and filing jointly) are subject to a 3.8% tax on all or a portion of their "net investment income," which includes interest, dividends, and certain capital gains (including certain capital gain distributions and capital gains realized on the sale of shares of the Fund). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Non-U.S. Investors

If you are a nonresident alien individual or a foreign corporation, trust or estate, (i) the Fund's ordinary income dividends will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies but (ii) gains from the sale or other disposition of shares of the Fund generally are not subject to U.S. taxation, unless you are a nonresident alien individual who is physically present in the U.S. for 183 days or more per year. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Non-U.S. shareholders who fail to provide an applicable IRS form may be subject to backup withholding on certain payments from the Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if you are a foreign shareholder engaged in a trade or business within the United States or if you are a foreign shareholder entitled to claim the benefits of a tax treaty.

Backup Withholding

The Fund (or financial intermediaries, such as brokers, through which shareholders own Fund shares) generally is required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and the sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding. The backup withholding rate is currently 24%. Backup withholding is not an additional tax and any amounts withheld may be credited against the shareholder's ultimate U.S. tax liability.

The foregoing discussion summarizes some of the consequences under current U.S. federal income tax law of an investment in the Fund. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences of an investment in the Fund under all applicable tax laws.

More information about taxes is in the SAI.

Additional Information

Investments by Other Registered Investment Companies

For purposes of the 1940 Act, the Fund is treated as a registered investment company. Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including shares of the Fund. Rule 12d1-4 under the 1940 Act permits registered investment companies to invest in exchange-traded funds offered by the Trust, including the Fund, beyond the limits of Section 12(d)(1) subject to certain terms and conditions, including that such registered investment companies enter into an agreement with the Trust. However, if the Fund were to invest in securities of other investment companies beyond the limits set forth in Section 12(d)(1)(A) by relying on Rule 12d1-4, other registered investment companies would not be permitted to rely on that rule to invest in that Fund in excess of the Section 12(d)(1)(A) limits.

Continuous Offering

The method by which Creation Units are purchased and traded may raise certain issues under applicable securities laws. Because new Creation Units are issued and sold by the Fund on an ongoing basis, at any point a "distribution," as such term is used in the Securities Act of 1933 (the "Securities Act"), may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the Prospectus delivery and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Fund's distributor, breaks them down into individual shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares of the Fund. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters" but are effecting transactions in shares of the Fund, whether or not participating in the distribution of such shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available with respect to such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker dealer-firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with shares of the Fund that are part of an "unsold allotment" within the meaning of Section 4(a)(3)(C) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. Firms that incur a prospectus delivery obligation with respect to shares of the Fund are reminded that under Rule 153 under the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that such Fund's Prospectus is available on the SEC's electronic filing system. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

Premium/Discount Information

Information regarding how often the shares of the Fund traded on the Exchange at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV of such Fund for various time periods can be found at www.PlusETF.com.

No financial highlights information is available for the Fund because it is new and has not commenced operations.

Exchange Listed Funds Trust
10900 Hefner Pointe Drive, Suite 400
Oklahoma City, Oklahoma 73120

ANNUAL/SEMI-ANNUAL REPORTS TO SHAREHOLDERS

Additional information about the Fund's investments will be available in the Fund's annual and semi-annual reports to shareholders and in Form N-CSR. In the annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during the last fiscal year. In Form N-CSR, you will find the Fund's annual and semi-annual financial statements.

STATEMENT OF ADDITIONAL INFORMATION (SAI)

The SAI provides more detailed information about the Fund. The SAI is incorporated by reference into, and is thus legally a part of, this Prospectus.

HOUSEHOLDING

Householding is an option available to certain Fund investors. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Please contact your broker-dealer if you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, or if you are currently enrolled in householding and wish to change your householding status.
