Fund Summary – Integrity Dividend Harvest ETF

Investment Objective

The Integrity Dividend Harvest ETF (the "Fund") seeks to maximize total return by emphasizing high current income with long term appreciation as a secondary objective, consistent with preservation of capital.

Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

Annual Fund Operating Expenses *(expenses that you pay each year as a percentage of the value of your investment)*	
Management Fee	0.70%
Distribution and Service (12b-1) Fees	0.00%
Other Expenses[1]	0.00%
Total Annual Fund Operating Expenses	0.70%
Fee Waiver/Expense Reimbursement[2]	(0.03)%
Total Annual Fund Operating Expenses After Waiver/Reimbursement	0.67%

[1] Based on estimated amounts for the current fiscal year.

[2] Exchange Traded Concepts, LLC (the "Adviser") has contractually agreed to waive its fees and reimburse expenses to the extent necessary to keep total annual operating expenses of the Fund (excluding amounts payable pursuant to any plan adopted in accordance with Rule 12b-1, interest expense, taxes, acquired fund fees and expenses, brokerage commissions, other expenditures which are capitalized in accordance with generally accepted accounting principles, and extraordinary expenses) from exceeding 0.67% of the Fund's average daily net assets for through at least August 31, 2027, unless earlier terminated by the Board of Trustees (the "Board") of Exchange Listed Funds Trust (the "Trust") for any reason at any time, or by the Adviser for any reason upon thirty days' prior notice to the Trust, such termination to be effective upon the expiration of the then-current term.

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest $10,000 in the Fund for the time periods indicated and then sell all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund's operating expenses (including one year of capped expenses each period) remain the same. Although your actual costs may be higher or lower, based on these assumptions your cost would be:

1 Year	3 Years
$68	$221

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when shares of the Fund are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example above, affect the Fund's performance. Because the Fund is new, portfolio turnover information is not yet available.

Principal Investment Strategies

To pursue its objective, the Fund normally invests at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in dividend-paying equity securities. The Fund's equity securities include common stock and preferred stock. In addition, under normal market conditions, the Fund invests at least 65% of its net assets in equity securities that have consistently increased dividends for a period of at least 10 years. In determining whether a company has increased its dividend for a period of at least 10 years, the Fund's investment sub-adviser, Viking Fund Management, LLC (the "Sub-Adviser") will account for the effect of any stock splits or spin-offs and exclude special dividends.

Although the Sub-Adviser's investment process results in the Fund holding primarily large-cap companies, the Fund may invest in companies of any size. In selecting securities, the Sub-Adviser considers a combination of factors, including, but not limited to, dividend yield, dividend growth rate, earnings growth, price-to-earnings (P/E) multiples, valuation, credit rating, balance sheet strength, and volatility. The Sub-Adviser emphasizes dividend yield in selecting stocks for the Fund because the Sub-Adviser believes that, over time, dividend income can contribute significantly to total return and is a more consistent source of investment return than capital appreciation.

While the Fund does not concentrate in any one industry, from time to time, based on economic conditions, it may make significant investments in certain sectors.

The Fund may invest up to 30% of its net assets in foreign equity securities, including common stock, depositary receipts and preferred stock.

The Sub-Adviser may consider selling a security if, among other considerations, the issuer's business fundamentals have deteriorated or the issuer fails to raise its dividend.

Principal Risks

As with all funds, a shareholder is subject to the risk that his or her investment could lose money. An investment in the Fund is not a bank deposit and is not insured or guaranteed by the FDIC or any government agency. The principal risks affecting shareholders' investments in the Fund, are set forth below.

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. A limited number of institutions act as authorized participants for the Fund. To the extent that these institutions exit the business or are unable to proceed with creation and/or redemption orders and no other authorized participant steps forward to create or redeem, the Fund's shares may trade at a premium or discount (the difference between the market price of the Fund's shares and the Fund's net asset value) and possibly face delisting and the bid/ask spread (the difference between the price that someone is willing to pay for shares of the Fund at a specific point in time versus the price at which someone is willing to sell) on the Fund's shares may widen.

Current Market Conditions Risk. Current market conditions risk is the risk that a particular investment, or shares of the Fund in general, may fall in value due to current market conditions. U.S. regulators have proposed several changes to market and issuer regulations which would directly impact the Fund, and any regulatory changes could adversely impact the Fund's ability to achieve its investment strategies or make certain investments. Recent and potential future bank failures could result in disruption to the broader banking industry or markets generally and reduce confidence in financial institutions and the economy as a whole, which may also heighten market volatility and reduce liquidity. The ongoing adversarial political climate in the United States, as well as political and diplomatic events both domestic and abroad, have and may continue to have an adverse impact the U.S. regulatory landscape, markets and investor behavior, which could have a negative impact on the Fund's investments and operations. Other unexpected political, regulatory and diplomatic events within the U.S. and abroad may affect investor and consumer confidence and may adversely impact financial markets and the broader economy. For example, ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Hamas and other militant groups in the Middle East, have caused and could continue to cause significant market disruptions and volatility within the markets in Russia, Europe, the Middle East and the United States. The hostilities and sanctions resulting from those hostilities have and could continue to have a significant impact on certain Fund investments as well as Fund performance and liquidity. The economies of the United States and its trading partners, as well as the financial markets generally, may be adversely impacted by trade disputes and other matters. For example, the United States has imposed trade barriers and restrictions on China. In addition, the Chinese government is engaged in a longstanding dispute with Taiwan, continually threatening an invasion. If the political climate between the United States and China does not improve or continues to deteriorate, if China were to attempt invading Taiwan, or if other geopolitical conflicts develop or worsen, economies, markets and individual securities may be adversely affected, and the value of the Fund's assets may go down. The COVID-19 global pandemic, or any future public health crisis, and the ensuing policies enacted by governments and central banks have caused and may continue to cause significant volatility and uncertainty in global financial markets, negatively impacting global growth prospects. While vaccines have been developed, there is no guarantee that vaccines will be effective against emerging future variants of the disease. As this global pandemic illustrated, such events may affect certain geographic regions, countries, sectors and industries more significantly than others. Advancements in technology may also adversely impact markets and the overall performance of the Fund. For instance, the economy may be significantly impacted by the advanced development and increased regulation of artificial intelligence. These events, and any other future events, may adversely affect the prices and liquidity of the Fund's portfolio investments and could result in disruptions in the trading markets.

Cybersecurity Risk. The Fund is susceptible to operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. Cyber security breaches may involve unauthorized access to the Fund's digital information systems through "hacking" or malicious software coding but may also result from outside attacks such as denial-of-service attacks through efforts to make network services unavailable to intended users. In addition, cyber security breaches of the issuers of securities in which the Fund invests or the Fund's third-party service providers, such as its administrator, transfer agent, custodian, or sub-adviser, as applicable, can also subject the Fund to many of the same risks associated with direct cyber security breaches. Although the Fund has established risk management systems designed to reduce the risks associated with cyber security, there is no guarantee that such efforts will succeed, especially because the Fund does not directly control the cyber security systems of issuers or third-party service providers.

Depositary Receipts Risk. The risks of investments in depositary receipts are substantially similar to Foreign Investment Risks. Sponsored and unsponsored depositary receipts involve risk not experienced when investing directly in the equity securities of an issuer. Depositary receipts may be less liquid than the underlying shares in their primary trading market. Any distributions paid to the holders of depositary receipts are usually subject to a fee charged by the depositary. Holders of depositary receipts may have limited voting rights, and investment restrictions in certain countries may adversely impact the value of depositary receipts.

Dividend-Paying Securities Risk. The Fund may have significant exposure to dividend-paying stocks. There is no guarantee that the issuers of the securities will declare dividends in the future or that, if declared, they will either remain at current levels or increase over time.

*Early Close/Trading Halt Risk. A*n exchange or market may close or issue trading halts on specific securities, or the ability to buy or sell certain securities or financial instruments may be restricted, which may result in the Fund being unable to buy or sell certain securities or financial instruments. In such circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses.

Equity Securities Risk. The value of the Fund's shares will fluctuate with changes in the value of the equity securities in which it invests. Equity securities prices fluctuate for several reasons, including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant equity market, such as market volatility, or when political or economic events affecting an issuer occur. Common stock prices may be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase. Equity securities may decline significantly in price over short or extended periods of time, and such declines may occur in the equity market as a whole, or they may occur in only a particular country, company, industry or sector of the market.

Foreign Securities Risk. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to expropriation, nationalization or adverse political or economic developments. Foreign securities may have relatively low market liquidity and decreased publicly available information about issuers. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. Non-U.S. issuers may also be subject to inconsistent and potentially less stringent accounting, auditing, financial reporting and investor protection standards than U.S. issuers. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments. In addition, where all or a portion of the Fund's portfolio holdings trade in markets that are closed when the Fund's market is open, there may be valuation differences that could lead to differences between the Fund's market price and the value of the Fund's portfolio holdings.

Large-Capitalization Risk. Returns on investments in securities of large companies could trail the returns on investments in securities of smaller and mid-sized companies or the market as a whole. The securities of large-capitalization companies may also be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Sub-Adviser's success or failure to implement investment strategies for the Fund. The Fund's principal investment strategies are dependent upon the use of the Sub-Adviser's proprietary security selection process and, as a result, the Sub-Adviser's skill in understanding and utilizing such processes. The achievement of the investment objective of the Fund cannot be guaranteed, and the Sub-Adviser's management of the Fund may not produce the intended results. In pursuing the Fund's investment objective, the Sub-Adviser has considerable discretion in deciding which investments to buy, hold or sell on a day-to-day basis, and which trading strategies to use. The Sub-Adviser's tax optimization strategies have not been independently tested or validated, and there can be no assurance that they will achieve the desired results. The use of such strategies may cause the Fund to underperform similar funds that do not engage in active and frequent trading and may not be successful.

Market Maker Risk. The Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares due to a limited number of market markers. Decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. The Fund may rely on a small number of third-party market makers to provide a market for the purchase and sale of shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's net asset value and the price at which the Fund's shares are trading on the Exchange, which could result in a decrease in value of the Fund's shares. This reduced effectiveness could result in Fund shares trading at a discount to net asset value and also in greater than normal intraday bid-ask spreads for Fund shares.

Market Risk. Market risk is the risk that a particular investment, or shares of the Fund in general, may fall in value. Securities are subject to market fluctuations caused by real or perceived adverse economic, political, and regulatory factors or market developments, changes in interest rates and perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments. In addition, local, regional or global events such as war, acts of terrorism, market manipulation, government defaults, government shutdowns, regulatory actions, political changes, diplomatic developments, the imposition of sanctions and other similar measures, spread of infectious diseases or other public health issues, recessions, natural disasters, or other events could have a significant negative impact on the Fund and its investments. Any of such circumstances could have a materially negative impact on the value of the Fund's shares, the liquidity of an investment, and may result in increased market volatility. During any such events, the Fund's shares may trade at increased premiums or discounts to their net asset value, the bid/ask spread on the Fund's shares may widen and the returns on investment may fluctuate.

New/Smaller Fund Risk. A new or smaller fund is subject to the risk that its performance may not represent how the fund is expected to or may perform in the long term. In addition, new funds have limited operating histories for investors to evaluate and new and smaller funds may not attract sufficient assets to achieve investment and trading efficiencies. There can be no assurance that the Fund will achieve an economically viable size, in which case it could ultimately liquidate. The Fund may be liquidated by the Board of Trustees (the "Board") without a shareholder vote. In a liquidation, shareholders of the Fund will receive an amount equal to the Fund's NAV, after deducting the costs of liquidation, including the transaction costs of disposing of the Fund's portfolio investments. Receipt of a liquidation distribution may have negative tax consequences for shareholders. Additionally, during the Fund's liquidation all or a portion of the Fund's portfolio may be invested in a manner not consistent with its investment objective and investment policies.

Operational Risk. The Fund is subject to risks arising from various operational factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund relies on third-parties for a range of services, including custody. Any delay or failure relating to engaging or maintaining such service providers may affect the Fund's ability to meet its investment objective. Although the Fund and the Fund's investment adviser seek to reduce these operational risks through controls and procedures, there is no way to completely protect against such risks.

Preferred Securities Risk. Preferred securities combine some of the characteristics of both common stocks and bonds. Preferred securities are typically subordinated to bonds and other debt securities in a company's capital structure in terms of priority to corporate income, subjecting them to greater credit risk than those debt securities. Generally, holders of preferred securities have no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may obtain limited rights. In certain circumstances, an issuer of preferred securities may defer payment on the securities and, in some cases, redeem the securities prior to a specified date. Preferred securities may also be substantially less liquid than other securities, including common stock.

Premium/Discount Risk. The market price of the Fund's shares will generally fluctuate in accordance with changes in the Fund's net asset value as well as the relative supply of and demand for shares on the Exchange. The Fund's investment adviser cannot predict whether shares will trade below, at or above their net asset value because the shares trade on the Exchange at market prices and not at net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for shares will be closely related, but not identical, to the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time. However, given that shares can only be purchased and redeemed in Creation Units, and only to and from broker-dealers and large institutional investors that have entered into participation agreements (unlike shares of closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their net asset value), the Fund's investment adviser believes that large discounts or premiums to the net asset value of shares should not be sustained. During stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the market for the Fund's underlying portfolio holdings, which could in turn lead to differences between the market price of the Fund's shares and their net asset value and the bid/ask spread on the Fund's shares may widen.

Small- and Mid-Capitalization Company Risk. The small- and mid-capitalization companies in which the Fund invests may be more vulnerable to adverse business or economic events than larger, more established companies, and may underperform other segments of the market or the equity market as a whole. Securities of small- and mid-capitalization companies generally trade in lower volumes, are often more vulnerable to market volatility, and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole.

Trading Issues Risk. Trading in Fund shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in Fund shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange's "circuit breaker" rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund's assets are small, the Fund does not have enough shareholders, or if the Fund is unable to proceed with creation and/or redemption orders.

Performance Information

The Fund is new and therefore has no performance history. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by comparing the Fund's return to a broad measure of market performance.

Investment Adviser

Exchange Traded Concepts, LLC (the "Adviser") serves as the investment adviser to the Fund. Viking Fund Management, LLC (the "Sub-Adviser") serves as the investment sub-adviser to the Fund.

Portfolio Managers

Shannon D. Radke, Senior Portfolio Manager and President of the Sub-Adviser, has served as a portfolio manager of the Fund since 2026.

Michael Morey, Portfolio Manager and Chief Investment Officer of the Sub-Adviser, has served as a portfolio manager of the Fund since 2026.

Joshua Larson, Portfolio Manager of the Sub-Adviser, has served as a portfolio manager of the Fund since 2026.

Trey Welstad, Portfolio Manager of the Sub-Adviser, has served as a portfolio manager of the Fund since 2026.

Andrew Serowik, Co-Chief Executive Officer and Portfolio Manager of the Adviser, has served as a portfolio manager of the Fund since 2026.

Gabriel Tan, Portfolio Manager of the Adviser, has served as a portfolio manager of the Fund since 2026.

Todd Alberico, Portfolio Manager of the Adviser, has served as a portfolio manager of the Fund since 2026.

Brian Cooper, Portfolio Manager of the Adviser, has served as a portfolio manager of the Fund since 2026.

Purchase and Sale of Fund Shares

The Fund issues and redeems shares on a continuous basis, at net asset value, only in large blocks of shares called "Creation Units." Individual shares of the Fund may only be purchased and sold on the secondary market through a broker-dealer. Since shares of the Fund trade on securities exchanges in the secondary market at their market price rather than their net asset value, the Fund's shares may trade at a price greater than (premium) or less than (discount) the Fund's net asset value. An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) when buying or selling shares in the secondary market (the "bid-ask spread"). Recent information, including the Fund's net asset value, market price, premiums and discounts, bid-ask spreads and the median bid-ask spread for the Fund's most recent fiscal year, is available online at www.etf.integrityvikingfunds.com.

Tax Information

Distributions made by the Fund may be taxable as ordinary income, qualified dividend income, or long-term capital gains, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or individual retirement account. In that case, you may be taxed when you take a distribution from such account, depending on the type of account, the circumstances of your distribution, and other factors.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Adviser may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Additional Principal Investment Strategies Information

The investment objective of the Fund is to maximize total return by emphasizing high current income with long term appreciation as a secondary objective, consistent with preservation of capital. The Fund is an actively managed ETF and the Sub-Adviser, subject to the supervision of the Adviser and the oversight of the Board of Exchange Listed Funds Trust (the "Trust"), has discretion on a daily basis to manage the Fund's portfolio in accordance with its investment objective and investment policies.

The Fund has adopted a policy to invest, under normal circumstances, at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in dividend-paying equity securities.

The Fund's investment objective, its 80% investment strategy and each of the policies described herein are non-fundamental policies and may be changed by the Board of Trustees of the Trust (the "Board") without shareholder approval upon 60 days' prior written notice to shareholders. Certain fundamental policies of the Fund are set forth in the Statement of Additional Information ("SAI") in the section entitled "Investment Objective and Policies."

The Fund expects to achieve its investment objective by investing in equity securities (e.g., common and preferred stock) of any market capitalization that are dividend paying equity securities. However, the Fund's Sub-Adviser generally expects to invest in large capitalization companies, which are generally to be those companies with market capitalizations exceeding $10 billion at the time of purchase.

In response to actual or perceived adverse market, economic, political, or other conditions and to retain flexibility in paying expenses, the Fund may (but will not necessarily), without notice, take a defensive position and invest up to 100% of its total assets, without limitation, in cash, cash equivalents, U.S. government securities, repurchase agreements collateralized by such securities, money market funds, and high-quality debt investments. If the Fund invests for such purposes, it may not achieve its investment objective. In addition, the defensive strategy may not work as intended.

Additional Principal Risk Information

Risk is inherent in all investing. Investing in the Fund involves risk, including the risk that you may lose all or part of your investment. There can be no assurance that the Fund will meet its stated objectives. The following section provides additional information regarding the principal risks of the Fund. The order of the below risk factors does not indicate the significance of any particular risk factor.

Principal Risks

Authorized Participant Concentration Risk. Only an authorized participant may engage in creation or redemption transactions directly with the Fund. A limited number of institutions act as authorized participants for the Fund. However, participants are not obligated to make a market in the Fund's shares or submit purchase and redemption orders for creation units. To the extent that these institutions exit the business, reduce their role or are unable to proceed with creation and/or redemption orders and no other authorized participant steps forward to create or redeem, the Fund's shares may trade at a premium or discount to the Fund's net asset value and possibly face delisting and the bid/ask spread on the Fund's shares may widen.

Current Market Conditions Risk. Current market conditions risk is the risk that a particular investment, or shares of the Fund in general, may fall in value due to current market conditions. U.S. regulators have proposed several changes to market and issuer regulations which would directly impact the Fund, and any regulatory changes could adversely impact the Fund's ability to achieve its investment strategies or make certain investments. Recent and potential future bank failures could result in disruption to the broader banking industry or markets generally and reduce confidence in financial institutions and the economy as a whole, which may also heighten market volatility and reduce liquidity. The ongoing adversarial political climate in the United States, as well as political and diplomatic events both domestic and abroad, have and may continue to have an adverse impact the U.S. regulatory landscape, markets and investor behavior, which could have a negative impact on the Fund's investments and operations. Other unexpected political, regulatory and diplomatic events within the U.S. and abroad may affect investor and consumer confidence and may adversely impact financial markets and the broader economy. For example, ongoing armed conflicts between Russia and Ukraine in Europe and among Israel, Hamas and other militant groups in the Middle East, have caused and could continue to cause significant market disruptions and volatility within the markets in Russia, Europe, the Middle East and the United States. The hostilities and sanctions resulting from those hostilities have and could continue to have a significant impact on certain Fund investments as well as Fund performance and liquidity. The economies of the United States and its trading partners, as well as the financial markets generally, may be adversely impacted by trade disputes and other matters. For example, the United States has imposed trade barriers and restrictions on China. In addition, the Chinese government is engaged in a longstanding dispute with Taiwan, continually threatening an invasion. If the political climate between the United States and China does not improve or continues to deteriorate, if China were to attempt invading Taiwan, or if other geopolitical conflicts develop or worsen, economies, markets and individual securities may be adversely affected, and the value of the Fund's assets may go down. The COVID-19 global pandemic, or any future public health crisis, and the ensuing policies enacted by governments and central banks have caused and may continue to cause significant volatility and uncertainty in global financial markets, negatively impacting global growth prospects. While vaccines have been developed, there is no guarantee that vaccines will be effective against emerging future variants of the disease. As this global pandemic illustrated, such events may affect certain geographic regions, countries, sectors and industries more significantly than others. Advancements in technology may also adversely impact markets and the overall performance of the Fund. For instance, the economy may be significantly impacted by the advanced development and increased regulation of artificial intelligence. These events, and any other future events, may adversely affect the prices and liquidity of the Fund's portfolio investments and could result in disruptions in the trading markets.

Cyber Security Risk. The Fund is susceptible to operational risks through breaches in cyber security. A breach in cyber security refers to both intentional and unintentional events that may cause the Fund to lose proprietary information, suffer data corruption or lose operational capacity. Such events could cause the Fund to incur regulatory penalties, reputational damage, additional compliance costs associated with corrective measures and/or financial loss. These risks typically are not covered by insurance. In general, cyber incidents can result from deliberate attacks or unintentional events. Cyber incidents include, but are not limited to, gaining unauthorized access to digital systems (*e.g.*, through "hacking" or malicious software coding) for purposes of misappropriating assets or sensitive information, corrupting data or causing operational disruption. Cyber attacks may also be carried out in a manner that does not require gaining unauthorized access, such as causing denial-of-service attacks on websites (*i.e.*, efforts to make network services unavailable to intended users). Cyber security failures by or breaches of the systems of the Adviser, distributor and other service providers (including, but not limited to, sub-advisers, index providers, fund accountants, custodians, transfer agents and administrators), market makers, authorized participants or the issuers of securities in which the Fund invests, have the ability to cause disruptions and impact business operations, potentially resulting in: financial losses; interference with the Fund's ability to calculate its net asset value; disclosure of confidential trading information; impediments to trading; submission of erroneous trades or erroneous creation or redemption orders; the inability of the Fund or its service providers to transact business; violations of applicable privacy and other laws; regulatory fines penalties, reputational damage, reimbursement or other compensation costs; or additional compliance costs. Substantial costs may be incurred by the Fund in order to resolve or prevent cyber incidents in the future. While the Fund has established business continuity plans in the event of, and risk management systems to prevent, such cyber attacks, there are inherent limitations in such plans and systems, including the possibility that certain risks have not been identified and that prevention and remediation efforts will not be successful. Furthermore, the Fund cannot control the cyber security plans and systems put in place by service providers to the Fund, issuers in which the Fund invests, market makers or authorized participants. However, there is no guarantee that such efforts will succeed, and the Fund and its shareholders could be negatively impacted as a result.

Depositary Receipts Risk. The Fund may invest in depositary receipts. Depositary receipts are securities issued by a bank or trust company reflecting ownership of underlying securities issued by a foreign company. An investment in depositary receipts involves further risks due to certain unique features. Any distributions paid to the holders of depositary receipts are usually subject to a fee charged by the depositary. Holders of depositary receipts may have limited voting rights pursuant to a deposit agreement between the underlying issuer and the depositary. In certain cases, the depositary will vote the shares deposited with it as directed by the underlying issuer's board of directors. Furthermore, investment restrictions in certain countries may adversely impact the value of depositary receipts because such restrictions may limit the ability to convert shares into depositary receipts and vice versa. Such restrictions may cause shares of the underlying issuer to trade at a discount or premium to the market price of the depositary receipt. Moreover, if depositary receipts are converted into shares, the laws in certain countries may limit the ability of a non-resident to trade the shares and to reconvert the shares to depositary receipts. Depositary receipts may be "sponsored" or "unsponsored." Sponsored depositary receipts are established jointly by a depositary and the underlying issuer, whereas unsponsored depositary receipts may be established by a depositary without participation by the underlying issuer. Holders of unsponsored depositary receipts generally bear all the costs associated with establishing the unsponsored depositary receipts. In addition, the issuers of the securities underlying unsponsored depositary receipts are not obligated to disclose material information in the U.S. and, therefore, there may be less information available regarding such issuers and there may not be a correlation between such information and the market value of the depositary receipts.

Dividend-Paying Securities Risk. There is no guarantee that issuers of the securities held by the Fund's Underlying Investments will declare dividends in the future or that, if declared, they will either remain at current levels or increase over time. The Fund may also underperform similar funds that invest without considering a company's dividend payments. Companies that pay dividends historically may not participate in a broad market advance to the same extent as other companies that do not pay dividends. Such companies may also be sensitive to a sharp rise in interest rates or an economic downturn that leads to the elimination or reduction of dividend payments to investors.

Early Close/Trading Halt Risk. An exchange or market may close early or issue trading halts on specific securities or financial instruments. The ability to trade certain securities or financial instruments may be restricted, which may disrupt the Fund's creation and redemption process, potentially affect the price at which the Fund's shares trade in the secondary market, and/or result in the Fund being unable to trade certain securities or financial instruments. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments, and/or may incur substantial trading losses.

Equity Securities Risk. The value of the Fund's shares will fluctuate with changes in the value of the equity securities in which it invests. Equity securities prices fluctuate for several reasons, including changes in investors' perceptions of the financial condition of an issuer or the general condition of the relevant equity market, such as market volatility, or when political or economic events affecting the issuers occur. Common stock prices may be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase. Equity securities may decline significantly in price over short or extended periods of time, and such declines may occur in the equity market as a whole, or they may occur in only a particular country, company, industry or sector of the market. Additionally, holders of an issuer's common stock may be subject to greater risks than holders of its preferred stock and debt securities because common stockholders' claims are subordinated to those of holders of preferred stocks and debt securities upon the bankruptcy of an issuer.

Foreign Securities Risk. Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to expropriation, nationalization or adverse political or economic developments. Foreign securities may have relatively low market liquidity and decreased publicly available information about issuers. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. Non-U.S. issuers may also be subject to inconsistent and potentially less stringent accounting, auditing, financial reporting and investor protection standards than U.S. issuers. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments. In addition, where all or a portion of the Fund's portfolio holdings trade in markets that are closed when the Fund's market is open, there may be valuation differences that could lead to differences between the Fund's market price and the value of the Fund's portfolio holdings.

Large-Capitalization Risk. Returns on investments in securities of large companies could trail the returns on investments in securities of smaller and mid-sized companies or the market as a whole. The securities of large-capitalization companies may also be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.

Management Risk. The Fund is actively-managed and may not meet its investment objective based on the Sub-Adviser's success or failure to implement investment strategies for the Fund. While the Fund's investment program was designed with a view to achieving its investment objective, there can be no assurance or guarantee that the Fund will achieve its stated investment objective over short- or long-term market cycles. Various legislative, regulatory, or tax restrictions, policies or developments may affect the success of the Fund's investment program and investment techniques utilized by the Fund.

Market Maker Risk. The Fund faces numerous market trading risks, including the potential lack of an active market for Fund shares due to a limited number of market markers. Decisions by market makers or authorized participants to reduce their role or step away from these activities in times of market stress could inhibit the effectiveness of the arbitrage process in maintaining the relationship between the underlying values of the Fund's portfolio securities and the Fund's market price. The Fund may rely on a small number of third-party market makers to provide a market for the purchase and sale of shares. Any trading halt or other problem relating to the trading activity of these market makers could result in a dramatic change in the spread between the Fund's net asset value and the price at which the Fund's shares are trading on the Exchange, which could result in a decrease in value of the Fund's shares. This reduced effectiveness could result in Fund shares trading at a discount to net asset value and also in greater than normal intraday bid-ask spreads for Fund shares.

*Market Risk***.** Market risk is the risk that a particular security, or shares of the Fund in general, may fall in value. Securities are subject to market fluctuations caused by such factors as economic, political, regulatory or market developments, changes in interest rates and perceived trends in securities prices. Shares of the Fund could decline in value or underperform other investments. In addition, local, regional or global events such as war, acts of terrorism, market manipulation, government defaults, government shutdowns, regulatory actions, political changes, diplomatic developments, the imposition of sanctions and other similar measures, spread of infectious diseases or other public health issues, recessions, natural disasters, or other events could have a significant negative impact on the Fund and its investments. Any of such circumstances could have a materially negative impact on the value of the Fund's shares, the liquidity of an investment, and may result in increased market volatility. During any such events, the Fund's shares may trade at increased premiums or discounts to their net asset value, the bid/ask spread on the Fund's shares may widen and the returns on investment may fluctuate.

New/Smaller Fund Risk. A new or smaller fund's performance may not represent how the fund is expected to or may perform in the long term if and when it becomes larger and has fully implemented its investment strategies. Investment positions may have a disproportionate impact (negative or positive) on performance in new and smaller funds. New and smaller funds may also require a period of time before they are fully invested in securities that meet their investment objectives and policies and achieve a representative portfolio composition. Fund performance may be lower or higher during this "ramp-up" period, and may also be more volatile, than would be the case after the fund is fully invested. Similarly, a new or smaller fund's investment strategy may require a longer period of time to show returns that are representative of the strategy. New funds have limited performance histories for investors to evaluate and new and smaller funds may not attract sufficient assets to achieve investment and trading efficiencies. If a new or smaller fund were to fail to successfully implement its investment strategies or achieve its investment objective, performance may be negatively impacted. Further, when a fund's size is small, the fund may experience low trading volumes and wide bid/ask spreads. In addition, a fund may face the risk of being delisted if the fund does not meet certain conditions of the listing exchange. If a fund were to be required to delist from the listing exchange, the value of the fund may rapidly decline and performance may be negatively impacted. There can be no assurance that the Fund will achieve an economically viable size. Any of the foregoing may result in the Fund being liquidated. The Fund may be liquidated by the Board without a shareholder vote. In a liquidation, shareholders of the Fund will receive an amount equal to the Fund's NAV, after deducting the costs of liquidation, including the transaction costs of disposing of the Fund's portfolio investments. Receipt of a liquidation distribution may have negative tax consequences for shareholders. Additionally, during the Fund's liquidation all or a portion of the Fund's portfolio may be invested in a manner not consistent with its investment objective and investment policies.

Operational Risk. The Fund is subject to risks arising from various operational factors, including, but not limited to, human error, processing and communication errors, errors of the Fund's service providers, counterparties or other third-parties, failed or inadequate processes and technology or systems failures. The Fund relies on third-parties for a range of services, including custody. Any delay or failure relating to engaging or maintaining such service providers may affect the Fund's ability to meet its investment objective. Although the Fund and the Fund's investment adviser seek to reduce these operational risks through controls and procedures, there is no way to completely protect against such risks.

Preferred Securities Risk. Preferred securities combine some of the characteristics of both common stocks and bonds. Preferred securities are typically subordinated to bonds and other debt securities in a company's capital structure in terms of priority to corporate income, subjecting them to greater credit risk than those debt securities. Generally, holders of preferred securities have no voting rights with respect to the issuing company unless preferred dividends have been in arrears for a specified number of periods, at which time the preferred security holders may obtain limited rights. In certain circumstances, an issuer of preferred securities may defer payment on the securities and, in some cases, redeem the securities prior to a specified date. Preferred securities may also be substantially less liquid than other securities, including common stock.

Premium/Discount Risk. The market price of the Fund's shares will generally fluctuate in accordance with changes in the Fund's net asset value as well as the relative supply of and demand for shares on the Exchange. The Adviser cannot predict whether shares will trade below, at or above their net asset value because the shares trade on the Exchange at market prices and not at net asset value. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for shares will be closely related, but not identical, to the same forces influencing the prices of the holdings of the Fund trading individually or in the aggregate at any point in time. However, given that shares can only be purchased and redeemed in Creation Units, and only to and from broker-dealers and large institutional investors that have entered into participation agreements (unlike shares of closed-end funds, which frequently trade at appreciable discounts from, and sometimes at premiums to, their net asset value), the Adviser believes that large discounts or premiums to the net asset value of shares should not be sustained absent disruptions to the creation and redemption mechanism, extreme market volatility or potential lack of authorized participants. During stressed market conditions, the market for the Fund's shares may become less liquid in response to deteriorating liquidity in the market for the Fund's underlying portfolio holdings, which could in turn lead to differences between the market price of the Fund's shares and their net asset value and the bid/ask spread on the Fund's shares may widen.

Small- and Mid-Capitalization Company Risk. The small- and mid-capitalization companies in which the Fund invests may be more vulnerable to adverse business or economic events than larger, more established companies, and may underperform other segments of the market or the equity market as a whole. Securities of small- and mid-capitalization companies generally trade in lower volumes, are often more vulnerable to market volatility, and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Some small- and mid-capitalization companies have limited product lines, markets, financial resources, and management personnel and tend to concentrate on fewer geographical markets relative to large-capitalization companies. Also, there is typically less publicly available information concerning small and mid-capitalization companies than for larger, more established companies. Small- and mid-capitalization companies also may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.

Trading Issues Risk. Trading in Fund shares on the Exchange may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares inadvisable. In addition, trading in Fund shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to the Exchange's "circuit breaker" rules. There can be no assurance that the requirements of the Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged. The Fund may have difficulty maintaining its listing on the Exchange in the event the Fund's assets are small, the Fund does not have enough shareholders, or if the Fund is unable to proceed with creation and/or redemption orders.

Portfolio Holdings

A description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio securities is available in the Fund's Statement of Additional Information (the "SAI").

Fund Management

Adviser

Exchange Traded Concepts, LLC, an Oklahoma limited liability company, is located at 10900 Hefner Pointe Drive, Suite 400, Oklahoma City, Oklahoma 73120, its primary place of business, and 295 Madison Avenue, New York, New York 10017. The Adviser was formed in 2009 and provides investment advisory services to exchange-traded funds.

Under an investment advisory agreement between the Trust, on behalf of the Fund, and the Adviser, the Adviser provides investment advisory services to the Fund. The Adviser is responsible for, among other things, the selection and ongoing monitoring of the securities in the Fund's portfolio, trading portfolio securities on behalf of the Fund, selecting broker-dealers to execute purchase and sale transactions, subject to the oversight of the Board, and certain other services necessary for the management of the Fund. For the services it provides to the Fund, the Adviser is entitled to a fee calculated daily and paid monthly at an annual rate of 0.70% of the average daily net assets of the Fund.

The Adviser has contractually agreed to waive its fees and reimburse expenses to the extent necessary to keep total annual operating expenses of the Fund (excluding amounts payable pursuant to any plan adopted in accordance with Rule 12b-1, interest expense, taxes, acquired fund fees and expenses, brokerage commissions, other expenditures which are capitalized in accordance with generally accepted accounting principles, and extraordinary expenses) from exceeding 0.67% of the Fund's average daily net assets through August 31, 2027, unless earlier terminated by the Board for any reason at any time.

ETC Platform Services, LLC ("ETC Platform Services"), a direct wholly-owned subsidiary of the Adviser, administers the Fund's business affairs and provides office facilities and equipment, certain clerical, bookkeeping and administrative services, paying agent services under the Fund's unitary fee arrangement (as described below), and its officers and employees to serve as officers or Trustees of the Trust. ETC Platform Services also arranges for transfer agency, custody, fund administration and accounting, and other non-distribution related services necessary for the Fund to operate. For the services it provides to the Fund, ETC Platform Services is paid a fee calculated daily and paid monthly based on a percentage of the Fund's average daily net assets.

Under the investment advisory agreement, the Adviser has agreed to pay all expenses incurred by the Fund (including the fee charged by ETC Platform Services), except for the advisory fee, interest, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, and distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act ("Excluded Expenses").

Pursuant to an SEC exemptive order and subject to the conditions of that order, the Adviser may, with Board approval but without shareholder approval, change or select new sub-advisers, materially amend the terms of an agreement with a sub-adviser (including an increase in its fee), or continue the employment of a sub-adviser after an event that would otherwise cause the automatic termination of services. Shareholders will be notified of any such changes.

A discussion regarding the basis for the Board's approval of the investment advisory agreement with the Adviser will be available in the Fund's first Form N-CSR.

Sub-Adviser

Viking Fund Management, LLC, a North Dakota limited liability company, is located at 1 N. Main Str., Minot, ND 58703. The Sub-Adviser has provided investment advisory services since 1999. The Sub-Adviser makes investment decisions for the Fund and continuously reviews, supervises, and administers the investment program of the Fund, subject to the supervision of the Adviser and the oversight of the Board. Under a sub-advisory agreement, with respect to the Fund, the Adviser pays the Sub-Adviser a fee calculated daily and paid monthly out of the fee the Adviser receives from the Fund.

The Sub-Adviser has contractually agreed to waive certain fees otherwise payable to it by the Adviser under the Sub-Advisory Agreement for the Fund by 0.03% through August 31, 2027, unless earlier terminated by the Adviser for any reason upon thirty days' prior notice to the Sub-Adviser, such termination to be effective upon the expiration of the then-current term.

A discussion regarding the basis for the Board's approval of the sub-advisory agreement with the Sub-Adviser will be available in the Fund's first Form N-CSR.

Portfolio Managers

Shannon D. Radke is a Governor, President, and Portfolio Manager of the Sub-Adviser. He holds a Bachelor of Business Administration degree in Banking and Finance from the University of North Dakota and has been engaged in the securities business since 1988 as a securities representative and as operations manager and later as chief operating officer of an investment advisory firm. Mr. Radke founded the Sub-Adviser in September 1998 and has been a Portfolio Manager for over 20 years.

Michael Morey is the Chief Investment Officer and Portfolio Manager of the Sub-Adviser and holds a Bachelor of Science degree in Finance from Minot State University. He joined the Sub-Adviser as a Research Analyst in 2009 and has been a Portfolio Manager since 2012.

Joshua Larson is a Portfolio Manager for the Sub-Adviser and holds a Bachelor of Science degree in Finance from Minot State University. He joined the Sub-Adviser as a Research Analyst in 2010 and has been a Portfolio Manager since 2012.

Trey Welstad is a Portfolio Manager of the Sub-Adviser and holds Bachelor of Science degrees in Finance, Business Management, and Marketing from Minot State University. He joined the Sub-Adviser as a Research Analyst in 2012 and has been a Portfolio Manager since 2015. Mr. Welstad is a CFA charterholder.

Andrew Serowik joined the Adviser in May 2018 as a Portfolio Manager from Goldman Sachs and was promoted to Co-Chief Executive Officer and Portfolio Manager in September 2025. He began his career at Spear, Leeds & Kellogg ("SLK"), continuing with Goldman after its acquisition of SLK in September 2000. During his career of more than 18 years at the combined companies, he held various roles, including managing the global Quant ETF Strats team and One Delta ETF Strats. He designed and developed systems for portfolio risk calculation, algorithmic ETF trading, and execution monitoring, with experience across all asset classes. He graduated from the University of Michigan with a Bachelor of Business Administration degree in finance.

Gabriel Tan joined the Adviser in May 2019 as an Associate Portfolio Manager and was promoted to Portfolio Manager in December 2020. He began his career at UBS and BBR Partners where he worked as a financial planning analyst and a portfolio strategist for over four years. During his time there, he developed comprehensive wealth management solutions focused on portfolio optimization, trust and estate planning, and tax planning. Mr. Tan graduated from the University of North Carolina at Chapel Hill with a Bachelor of Science in Business Administration with a concentration in Investments, a Bachelor of Arts in Economics, and a Minor in Chinese.

Mr. Alberico joined the Adviser in November 2020 as a Portfolio Manager. From 2005 to 2011, he worked on the ETF trading and portfolio risk management team at Goldman Sachs. He subsequently held roles at Cantor Fitzgerald (from 2011 to 2013) and Virtu Financial (from 2013 to 2020). Mr. Alberico has worked on several different facets of ETF trading, from lead market-making and electronic trading to customer facing institutional business developing models for block trading as well as transitional trades. Mr. Alberico graduated from St. John's University in NY with a Bachelor of Science degree in Finance.

Mr. Cooper joined the Adviser as a Portfolio Manager in November 2021. Previously, Mr. Cooper had roles in trade operations for Constellation Advisers from March 2017 until April 2018 and for QFR Capital Management from April 2018 until July 2020 and in the middle office derivatives group of Elliot Capital Management from September 2020 until November 2021. Prior to these roles, he spent 14 years working in various operational roles for Falcon Management Corporation, a global macro family office, gaining exposure to a variety of asset classes with a focus on operations, accounting, and technology. Mr. Cooper graduated from Pennsylvania State University in 2002 with a Bachelor of Science in Finance and a minor in Business Law.

The SAI provides additional information about the portfolio managers' compensation, other accounts managed, and ownership of Fund shares.

Buying and Selling Fund Shares

General

Shares of the Fund are listed for trading on the Exchange. When you buy or sell the Fund's shares on the secondary market, you will pay or receive the market price. You may incur customary brokerage commissions and charges and may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. The shares of the Fund will trade on the Exchange at prices that may differ to varying degrees from the daily NAV of such shares. A business day with respect to the Fund is any day on which the Exchange is open for business. The Exchange is generally open Monday through Friday and is closed on weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

NAV per share for the Fund is computed by dividing the value of the net assets of that Fund (*i.e.*, the value of its total assets less total liabilities) by its total number of shares outstanding. Expenses and fees, including management and distribution fees, if any, are accrued daily and taken into account for purposes of determining NAV. NAV is determined each business day, normally as of the close of regular trading of the New York Stock Exchange (ordinarily 4:00 p.m., Eastern time).

When determining NAV, the value of the Fund's portfolio investments is determined pursuant to the Trust's valuation policy and the Adviser's fair valuation policy and procedures. In general, the value of the Fund's portfolio investments is based on market prices of securities, which generally means a valuation obtained from an exchange or other market (or based on a price quotation or other equivalent indication of the value supplied by an exchange or other market) or a valuation obtained from an independent pricing service. Pursuant to Rule 2a-5 under the 1940 Act, the Adviser has been designated by the Board as the valuation designee with responsibility for fair valuation subject to oversight by the Board. If an investment's market price is not readily available or does not otherwise accurately reflect the fair value of the security, pursuant to the Trust's valuation policy, the investment will be fair valued in accordance with the Adviser's fair valuation policy and procedures, which were approved by the Board. An investment may be fair valued in a variety of circumstances, including but not limited to, situations when the value of a security in the Fund's portfolio has been materially affected by events occurring after the close of the market on which the security is principally traded but prior to the close of the Exchange (such as in the case of a corporate action or other news that may materially affect the price of a security) or trading in a security has been suspended or halted. Accordingly, the Fund's NAV may reflect certain portfolio securities' fair values rather than their market prices.

Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security will materially differ from the value that could be realized upon the sale of the security.

Frequent Purchases and Redemptions of Fund Shares

The Fund does not impose any restrictions on the frequency of purchases and redemptions of Creation Units; however, the Fund reserves the right to reject or limit purchases at any time as described in the SAI. When considering that no restriction or policy was necessary, the Board evaluated the risks posed by arbitrage and market timing activities, such as whether frequent purchases and redemptions would interfere with the efficient implementation of the Fund's investment strategy, or whether they would cause the Fund to experience increased transaction costs. The Board considered that, unlike traditional mutual funds, shares of the Fund are issued and redeemed only in large quantities of shares known as Creation Units available only from the Fund directly to Authorized Participants, and that most trading in the Fund occurs on the Exchange at prevailing market prices and does not involve the Fund directly. Given this structure, the Board determined that it is unlikely that trading due to arbitrage opportunities or market timing by shareholders would result in negative impact to the Fund or its shareholders. In addition, frequent trading of the Fund's shares by Authorized Participants and arbitrageurs is critical to ensuring that the market price remains at or close to NAV.

Distribution and Service Plan

The Fund has adopted a Distribution and Service Plan in accordance with Rule 12b-1 under the 1940 Act pursuant to which payments of up to 0.25% of the Fund's average daily net assets may be made for the sale and distribution of its shares. No payments pursuant to the Distribution and Service Plan will be made during the twelve (12) month period from the date of this Prospectus. Thereafter, 12b-1 fees may only be imposed after approval by the Board. Because these fees, if imposed, would be paid out of the Fund's assets on an ongoing basis, if payments are made in the future, these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.

Dividends, Distributions and Taxes

Fund Distributions

The Fund pays out dividends from its net investment income monthly and distributes its net capital gains, if any, to investors at least annually.

Dividend Reinvestment Service

Brokers may make available to their customers who own shares of the Fund the Depository Trust Company book-entry dividend reinvestment service. If this service is available and used, dividend distributions of both income and capital gains will automatically be reinvested in additional whole shares of the applicable Fund purchased on the secondary market. Without this service, investors would receive their distributions in cash. To determine whether the dividend reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker. Brokers may require the Fund's shareholders to adhere to specific procedures and timetables.

Tax Information

The following is a summary of certain important U.S. federal income tax issues that affect the Fund and its shareholders. The summary is based on current tax laws, which may be changed by legislative, judicial or administrative action. You should not consider this summary to be a comprehensive explanation of the tax treatment of the Fund, or the tax consequences of an investment in the Fund. More information about taxes is located in the SAI. You are urged to consult your tax adviser regarding specific questions as to federal, state and local income taxes.

Tax Status of the Fund

The Fund has elected and intends to qualify each year for the special tax treatment afforded to a RIC under the Internal Revenue Code. As long as the Fund maintains its qualification for treatment as a RIC and meets certain minimum distribution requirements, then it generally is not subject to federal income tax on the earnings it timely distributes to its shareholders. However, if the Fund fails to qualify as a RIC or to meet minimum distribution requirements it would result in fund level taxation (if certain relief provisions were not available) and consequently a reduction in income available for distribution to shareholders.

Unless you are a tax-exempt entity or your investment in Fund shares is made through a tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when the Fund makes distributions, you sell Fund shares, and you purchase or redeem Creation Units (Authorized Participants only).

Tax Status of Distributions

- The Fund intends to distribute for each year substantially all of its net investment income and net capital gains income.

- Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional shares of the Fund.

- The income dividends you receive from the Fund will be generally taxed as either ordinary income or "qualified dividend income." Dividends that are reported by the Fund as qualified dividend income are generally taxable to non-corporate shareholders at a maximum tax rate currently set at 20% (lower rates apply to individuals in lower tax brackets). Qualified dividend income generally is income derived from dividends paid to the Fund by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. South Korea has a comprehensive income tax treaty with the United States that permits corporations incorporated therein to be treated as qualified foreign corporations that are able to distribute dividends eligible to be treated as qualified dividend income. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. For such dividends to be taxed as qualified dividend income to a non-corporate shareholder, the Fund must satisfy certain holding period requirements with respect to the underlying stock, and the non-corporate shareholder must satisfy holding period requirements with respect to his or her ownership of the Fund's shares. Holding periods may be suspended for these purposes for stock that is hedged.

- Taxes on distributions of capital gains (if any) may be determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned their shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses.

- Distributions from the Fund's short-term capital gains are generally taxable as ordinary income. Distributions from the Fund's net capital gain (the excess of the Fund's net long-term capital gains over its net short-term capital losses) are taxable as long-term capital gains regardless of how long you have owned your shares of the Fund. For non-corporate shareholders, long-term capital gains are generally taxable at tax rates of up to 20% (lower rates apply to individuals in lower tax brackets).

- Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. Certain of the Fund's investment strategies may limit their ability to make distributions eligible for the dividends received deduction for corporate shareholders.

- In general, your distributions are subject to federal income tax for the year in which they are paid. However, distributions paid in January but declared by the Fund in October, November or December of the previous year payable to shareholders of record in such a month may be taxable to you in the previous year.

- You should note that if you purchase shares of the Fund just before a distribution, the purchase price would reflect the amount of the upcoming distribution. In this case, you would be taxed on the entire amount of the distribution received, even though, as an economic matter, the distribution simply constitutes a return of your investment. This is known as "buying a dividend" and should be avoided by taxable investors.

- The Fund (or your broker) will inform you of the amount of your ordinary income dividends, qualified dividend income, and net capital gain distributions shortly after the close of each calendar year.

Tax Status of Share Transactions

Each sale of Fund shares or redemption of Creation Units will generally be a taxable event. In general, any gain or loss realized upon a taxable disposition of shares by a shareholder will be treated as capital gain or loss if the shares are capital assets in the shareholder's hands, and will be long-term capital gain or loss if the shares have been held for more than 12 months, and short-term capital gain or loss if the shares are held for 12 months or less. Any capital loss on the sale of shares of the Fund held for six months or less is treated as long-term capital loss to the extent distributions of long-term capital gain were paid (or treated as paid) with respect to such shares. Any loss realized on a sale will be disallowed to the extent shares of the Fund are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the sale of Fund shares. The ability to deduct capital losses may be limited.

An Authorized Participant who exchanges securities for Creation Units generally will recognize gain or loss from the exchange. The gain or loss will be equal to the difference between (i) the market value of the Creation Units at the time of the exchange plus any cash received in the exchange and (ii) the exchanger's aggregate basis in the securities surrendered plus any cash paid for the Creation Units. An Authorized Participant who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between (i) the exchanger's basis in the Creation Units and (ii) the aggregate market value of the securities and the amount of cash received. The IRS, however, may assert that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing "wash sales" (for a person who does not mark-to-market their holdings), or on the basis that there has been no significant change in economic position. Authorized Participants should consult their own tax advisor with respect to whether wash sales rules apply and when a loss might be deductible.

The Fund may include cash when paying the redemption price for Creation Units in addition to, or in place of, the delivery of a basket of securities. The Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment than if the in-kind redemption process was used.

Foreign Taxes

To the extent the Fund invests in foreign securities, it may be subject to foreign withholding taxes with respect to dividends or interest the Fund receives from sources in foreign countries. If more than 50% of the total assets of the Fund consist of foreign securities, the Fund will be eligible to elect to treat some of those taxes as a distribution to shareholders, which would allow shareholders to offset some of their U.S. federal income tax. The Fund (or your broker) will notify you if it makes such an election and provide you with the information necessary to reflect foreign taxes paid on your income tax return.

Foreign tax credits, if any, received by the Fund as a result of an investment in another RIC (including an ETF which is taxable as a RIC) will not be passed through to you unless the Fund qualifies as a "qualified fund-of-funds" under the Internal Revenue Code. If the Fund is a "qualified fund-of-funds" it will be eligible to file an election with the IRS that will enable the Fund to pass along these foreign tax credits to its shareholders. The Fund will be treated as a "qualified fund-of-funds" under the Internal Revenue Code if at least 50% of the value of the Fund's total assets (at the close of each quarter of the Fund's taxable year) is represented by interests in other RICs.

Net Investment Income Tax

U.S. individuals with income exceeding $200,000 ($250,000 if married and filing jointly) are subject to a 3.8% tax on all or a portion of their "net investment income," which includes interest, dividends, and certain capital gains (including certain capital gain distributions and capital gains realized on the sale of shares of the Fund). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

Non-U.S. Investors

If you are a nonresident alien individual or a foreign corporation, trust or estate, (i) the Fund's ordinary income dividends will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies but (ii) gains from the sale or other disposition of shares of the Fund generally are not subject to U.S. taxation, unless you are a nonresident alien individual who is physically present in the U.S. for 183 days or more per year. The Fund may, under certain circumstances, report all or a portion of a dividend as an "interest-related dividend" or a "short-term capital gain dividend," which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Non-U.S. shareholders who fail to provide an applicable IRS form may be subject to backup withholding on certain payments from the Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if you are a foreign shareholder engaged in a trade or business within the United States or if you are a foreign shareholder entitled to claim the benefits of a tax treaty.

Backup Withholding

The Fund (or financial intermediaries, such as brokers, through which shareholders own Fund shares) generally is required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and the sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that he, she or it is not subject to such withholding. The backup withholding rate is currently 24%. Backup withholding is not an additional tax and any amounts withheld may be credited against the shareholder's ultimate U.S. tax liability.

The foregoing discussion summarizes some of the consequences under current U.S. federal income tax law of an investment in the Fund. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences of an investment in the Fund under all applicable tax laws.

More information about taxes is in the SAI.

Additional Information

Investments by Other Registered Investment Companies

For purposes of the 1940 Act, the Fund is treated as a registered investment company. Section 12(d)(1) of the 1940 Act restricts investments by investment companies in the securities of other investment companies, including shares of the Fund. Rule 12d1-4 under the 1940 Act permits registered investment companies to invest in exchange-traded funds offered by the Trust, including the Fund, beyond the limits of Section 12(d)(1) subject to certain terms and conditions, including that such registered investment companies enter into an agreement with the Trust. However, if the Fund were to invest in securities of other investment companies beyond the limits set forth in Section 12(d)(1)(A) by relying on Rule 12d1-4, other registered investment companies would not be permitted to rely on that rule to invest in that Fund in excess of the Section 12(d)(1)(A) limits.

Continuous Offering

The method by which Creation Units are purchased and traded may raise certain issues under applicable securities laws. Because new Creation Units are issued and sold by the Fund on an ongoing basis, at any point a "distribution," as such term is used in the Securities Act of 1933 (the "Securities Act"), may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the Prospectus delivery and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Fund's distributor, breaks them down into individual shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares of the Fund. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not "underwriters" but are effecting transactions in shares of the Fund, whether or not participating in the distribution of such shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available with respect to such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker dealer-firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with shares of the Fund that are part of an "unsold allotment" within the meaning of Section 4(a)(3)(C) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. Firms that incur a prospectus delivery obligation with respect to shares of the Fund are reminded that under Rule 153 under the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that such Fund's Prospectus is available on the SEC's electronic filing system. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

Premium/Discount Information

Information regarding how often the shares of the Fund traded on the Exchange at a price above (*i.e.*, at a premium) or below (*i.e.*, at a discount) the NAV of such Fund for various time periods can be found at www.etf.integrityvikingfunds.com.

Financial Highlights

No financial highlights information is available for the Fund because it is new and has not commenced operations.

Exchange Listed Funds Trust
10900 Hefner Pointe Drive, Suite 400
Oklahoma City, Oklahoma 73120

ANNUAL/SEMI-ANNUAL REPORTS TO SHAREHOLDERS

Additional information about the Fund's investments will be available in the Fund's annual and semi-annual reports to shareholders and in Form N-CSR. In the annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during the last fiscal year. In Form N-CSR, you will find each Fund's annual and semi-annual financial statements.

STATEMENT OF ADDITIONAL INFORMATION (SAI)

The SAI provides more detailed information about the Fund. The SAI is incorporated by reference into, and is thus legally a part of, this Prospectus.

HOUSEHOLDING

Householding is an option available to certain Fund investors. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Please contact your broker-dealer if you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, or if you are currently enrolled in householding and wish to change your householding status.

HOW TO OBTAIN MORE INFORMATION ABOUT THE FUND

To request a free copy of the latest annual or semi-annual report (when available) or the SAI, or to request additional information about the Fund, such as the Fund's financial statements, or to make other inquiries, please contact us as follows:

Call: 888-772-5564
Monday through Friday
8:30 a.m. to 5:00 p.m. (Eastern Time)

Write: Exchange Listed Funds Trust
10900 Hefner Pointe Drive, Suite 400
Oklahoma City, Oklahoma 73120

Visit: www.etf.integrityvikingfunds.com

The SAI and other information are also available from a financial intermediary (such as a broker-dealer or bank) through which the Fund's shares may be purchased or sold.

INFORMATION PROVIDED BY THE U.S. SECURITIES AND EXCHANGE COMMISSION
