# JUMPSTART

SCHOLARSHIP PROGRAM

## You Can Help Local Students Launch Their Future

**Two of every three new jobs created in Florida by 2025 will require education or training beyond high school.**

Today's students need higher education to adapt and thrive in our changing economic landscape.

Fast-track technical or vocational certificate programs can launch students into many high-demand careers. For other eligible students, we have an opportunity to get them on a two- or four-year post-secondary path with a remarkable, highly flexible scholarship opportunity that covers a full year of Florida college tuition for a fraction of the value.

The Consortium of Florida Education Foundations and the Florida Prepaid College Foundation are creating a pathway for deserving high school seniors to jump start their future through local education foundation sponsored need-based scholarships for post-secondary education.

Each Jump Start scholarship provides recipients:

- 30 credit hours of tuition at a Florida state public college or the equivalent value at Florida public universities and technical colleges for eligible credit-hour programs.
- Support for college success, including financial aid, life skills and career exploration workshops.

By becoming a Jump Start sponsor, your organization can purchase scholarships worth \$3,000 each at a fraction of their value and provide life-changing opportunities to promising local high school seniors while contributing to the overall economic future of your community.
