Feb 24, 2020 LatinVFR has released Santiago International Airport (SCEL) for Microsoft Flight Simulator. The scenery features PBR texturing, . Mar 13, 2019 LatinVFR releases Santiago SCEL for MSFS. This airport (SCEL) is a very detailed recreation of the Santiago Airport, which is one of the most modern and modern airport in the world. I'd say it's definitely one of the best airports on the planet. Of course, don't expect it to be exactly accurate, but close. Feb 23, 2019 Someone has signed in on my ATSCC forum with the username f3s2 and said: "José Luis Quintero - Spaniard, ex-Asobo Studio SCEL Developer" Which I interpret is that he used to work on Santiago de Chile Arturo Merino Benítez Airport (SCEL) back in 2002 and 2003 by Asobo Studios and quit his career on Asobo Studios. Anyway, his Santiago de Chile Arturo Merino Benítez Airport (SCEL) was pretty good, and I'd love to get a copy of it back, but it would be very difficult. The airport is owned by Asobo Studios, which no longer exist, that is why it wouldn't be possible to get it back. Jul 22, 2018 Now LatinVFR has released Arturo Merino Benítez International Airport (SCEL) in Santiago, Chile, for Microsoft Flight Simulator. Jul 22, 2018 The scenery is completely done by LatinVFR and it's ready to use. May 28, 2018 A new version of SCEL was released by Asobo Studios. I know that there are several solutions that allow you to take a screen recording and cut the desired section of the screen recording, but I would like to know if there is a program or tool that allow you to do something like this: Take one screen recording (say, from a YouTube video) Easily split the screen recording into several parts Cut one or more parts from the video Merge the parts back to one big, continuous video I am aware of the Linux Stitch app, but it seems to only work when the video is bigger than what it would split at one time, and it only works with audio. Are there any other options? Maybe a solution for Mac or Windows? A: Shake video is an easy to use and free program for Windows. Shake allows you to take videos of web sites, apps, or even the whole desktop by automatically recording from your webcam, microphone, or display. It also allows you to cut and reorder portions of the video easily with its drag and drop interface. SMTP SASL SASL AUTH LOGIN SASL-IR RFC4954 3da54e8ca3
