A viewport is a rectangle with the width, height and location defined. This window is typically in the lower half of the screen and is used to work with a drawing. Another way to view drawings is using the command line. AutoCAD provides a "Show View" command line option that starts the viewport GUI, while the "Show View" command is the specific command to view drawings in the command line. A viewport has a name, it is either named "View Window" or "View" depending on the viewport option, and it can be saved in a drawing or be opened in a drawing. Auto
