Recommendation:
Approve

Purpose of Request:

Approve the Sole Source Service Agreement for Landfill Leachate Treatment Plant for Public Works and Utilities to Rochem Americas, Inc. of Hermosa Beach, CA, in the estimated annual amount of \$105,000.00.

History:

Rochem Americas, Inc. is the US distributor for the Rochem Group and has provided leachate treatment systems worldwide since 1988.

Rochem's modules and elements are the only reverse osmosis modules designed for treating landfill leachate. Rochem's advanced technology is proven to remove organic and inorganic compounds efficiently and economically, with a long membrane and system life. The Rochem technology has been designed specifically for treating landfill leachate.

Facts and Issues:

Options:

Landfill leachate, a landfill by-product, is created when rainwater filters through buried wastes in a landfill. The rainwater *leaches*, or dissolves, constituents that are in those wastes. This process is similar to making a cup of coffee; the coffee is created when water percolates through the ground coffee beans.

According to the National Institutes of Health, leachate treatment is essential for eliminating harmful contaminants and organic substances that negatively impact water sources such as surface water and groundwater, which ultimately can damage human health.

This agreement runs from July 1, 2023, to June 30, 2024.
