## FY26 Price Increase Requests

### HALL COUNTY DEPARTMENT OF PUBLIC WORKS TRAFFIC ENGINEERING DIVISION

Signs and blanks shall be 0.080 aluminum. Unless otherwise noted all sheeting and lettering must be \*3M-HIP (high intensity prismatic) grade, reflective, and must comply with Georgia Department of Transportation specifications.

\*Street sign blanks must be extruded aluminum, 9" wide, 0.250" rail thickness, 0.080" minimum blade thickness, 3/8" diameter holes for sign bracket (2 on top, 2 on bottom), 3-1/2" center to center hole spacing.

All signs must be shipped separated with heavy duty coated paper, sorted by type of sign, packaged in quantities of 10 or less for sizes 30" x 30" and under (5 or less for sizes 36" x 36" and above), in a cardboard envelope. The MUTCD number, and quantity of signs inside package, must be written on the outside of the cardboard envelope.
