Good morning,

I am attaching you a picture of the building that Dennis Sharp describes as an eye sore. The building is not in front of my house.

On the left is a Koi pond with an aerator plugged into electricity, it is not a fountain (what is wrong with a fountain?). On the end of the building is a motion detection solar powered light (not a flood light). Is it against the law to have a flood light?

In regards to me or my daughter walking out the road, has he complained about any of the other neighbors that are out exercising? Anyone walking out the road has nothing to do with the building. As you can see his complaints are petty.

I look forward to working with you to correct the permitting problem.

Thank you for your help,

Nedra Riddle
