to whom it may concern,

my husband, edgar torres and i have full intentions to build our forever home on tract 2. we would love to be closer to family and live next door to my parents. we have decided to build on tract 2 because tract 1 does not meet the requirements 90 to 100 ft. from the road, we have spent our hard earned money on both tracts and would love to see if we could push tract 1 50 feet from the road. pushing the tracts back would not be ideal as the land starts to go down.
