

Current plan for 3761 Winder Hwy, Flowery Branch GA 30542

Use the current home to finish out kitchen, prep space and linen prep areas for Mumpower and Associates LLC to prepare food to be sold and catered out of Food /Mobile Truck.

This truck will be call Peach's Kitchen. The truck will offer catering services to venues, event food truck services and POS services to public along with breweries and private events. The truck will offer a variety of menus, food options and set up options. The food that will be sold and catered will be prepped and prepared at the location stated above. The employees will adhere to all state and county requirements when preparing food and services.

The kitchen set up will include and not limited to oven, stove, dishwasher and prep tables.

BBQ will be smoked on smoker outdoors and the temperature closely regulated. All other food will be cooked in the kitchen located at above address. Above address is under remodel at this time and being upgraded to meet state and local requirements. Mumpower and Associates will begin this operation as soon as said address meets needed kitchen set up and the 2014 Freightliner food truck is equipped for operation.

X LATER and NOT prior to the food truck above mentioned, the above address would like to offer rental of kitchen and shared kitchen service. Mumpower and Associates would like to establish a kitchen that is suitable for food truck prep, bakers use and rent to 3 total companies. Those using the shared kitchen (other bakers, food trucks and food services) would have the opportunity to rent the kitchen for blocked time. During that time, they would hang their license upon entry and be responsible for all inspections during their food prep and kitchen uses. No 2 business operators would ever use the kitchen at same time. It would always be ONE business and one licensed food provider, food truck owner, baker etc.

Space will be available to block up to 60 days in advance. The space will have clear calendar that is visible at entry as to who is working (by time and date).

Food grade walls, ceilings and floors will be in the kitchen. Equipment is going to meet state and local requirements and will be identified and ordered once the county has given feed back on use.

There will be hand sink, delegated veggie sink and 3 compartment sink as well as dishwasher.
