

# Kitchen Boxes

## Versatile and efficient boxes designed specifically for the kitchen

Water-Tite's kitchen boxes provide multiple configurations for any installation. When installing a kitchen box the need for stub outs is eliminated, resulting in a faster installation and labor savings. As soon as the supply and drain systems are roughed-in, pressure tests can be performed for both line and valve leaks at the same time. Installing a kitchen box ensures a clean and efficient finished product, every time.
