# PRESSURE RELIEF PNEUMATIC TEST PLUGS

## FEATURES

- 1 Patent pending pressure-relief valve is integrated into a glass-filled nylon core for protection and extra rigidity in the field.
- 2 PR valve prevents over-inflation and releases excess pressure into the atmosphere rather than into the test area which can cause the pipe to slip out of place.
- 3 One piece molded rubber body with no glued seams eliminates common reason for failure.
- 4 Ring tag is attached to nylon core rather than valve stem for extra rigidity.
- 5 PR test plugs with 48" chain and 5' hose included are available for testing sewer cleanouts

- 6 Compact design allows easy access, even in a cleanout tee
- 7 Molded plastic tag will not bend or deform which prevents it from falling into the pipe
- 8 Industry-leading 3 year limited warranty

## DEEP TECHNO-CAPS™

Heavy-duty PVC or ABS test cap

Extra deep 1" solvent weld socket

Provides room for errors on pipe that isn't cut straight

Tested to 5 stories of head pressure (22 psig)

Offers an economical solution to heavy duty PVC or ABS schedule 40 DMV end caps

## SUPERIOR CAP COVERAGE WITH MAXIMUM BONDING SURFACE AREA

Deep techno caps can be used on pipe cut precise at 90° or on pipe cut at a slight angle. The deeper sides provide ample surface area for a secure solvent weld.
