

**NEW
SIZE**

Water•Tite **Heavy Duty** **Plastic Washing** **Machine Pans**

Provides protection from washing machine overflow or hose failure.

Overview

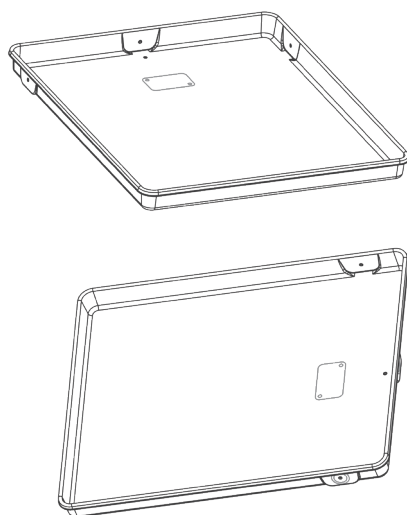

Water-Tite Washing Machine Pans easily fit underneath machines to prevent water damage to floors associated with washing machine or hose leaks. The pans protect floors from scuffs, spills, and overflows; and meets code for use in second floor laundry rooms. The included PVC adapter will securely attach to a drain line for water evacuation.

Features

- White, High-impact plastic – will not rust, corrode or crack
- 1" x 1½" PVC drain connection included
- Provides protection from washing machine overflow or hose failure
- Pan not drilled, design allows for many drain options

Installation Instructions

Always check local codes before installation.

- 01** Determine size of required washing machine pan.
NOTE: Suggested to include a 1" to 2" gap around pan, from edge of pan to washing machine.
- 02** Locate installation site of washing machine pan and find the preferred drain outlet location.
- 03** Drill 1 $\frac{3}{8}$ " hole and install the included 1"x 1 $\frac{1}{2}$ " PVC male adapter.
NOTE: Install the adapter and rubber sealing washer from the outside of the pan and then attach the locking nut to the adapter threads from inside the pan.
- 04** Verify installation area is free of debris and pan is on a flat surface.
 Inspect pan for any damage before placing washing machine in pan.
- 05** Using two people, place the washing machine in the washing machine pan. Be aware of the pan edges, as not to damage the pan.
- 06** Connect PVC piping to PVC adapter using PVC solvent cement.
