The “Classic” Waste & Overflow

Easy installation and testing all in one

AB&A's new and improved, patent pending, Classic waste and overflow system keeps getting better. The newly designed, high-flow capacity Classic overflow cover plate is slotted to provide greater drainage through the tub overflow. Installers can easily secure the overflow elbow, gasket, and cover plate to the tub without the use of a screwdriver or screws. Test plugs and caps are always included with the Classic waste and overflow system.

NEW & IMPROVED

- 1 Push-on overflow cover plate easily secures to the overflow elbow for a snug fit against tub wall
- 2 High-flow capacity overflow cover plate allows water flow at approximately 7 gpm (typical tub valve = 5-6 gpm)
- 3 Tool less installation
- 4 Extra (thin) gasket included for thick-walled tubs (e.g. marble)
- 5 Solid cover plate (no slots) is available as an accessory
