Pre-Plumbed Sewage Pump System – 18 x 30 Basin

1/2 HP

This Pre-Plumbed Sewage Pump System is fully plumbed and ready to install. Included in the system is a sewage pump, sewage pump basin and basin cover, check valve and inlet hub.

The interior plumbing uses heavy duty schedule 80 PVC pipe and the discharge pipe quickly connects to the cover via a specifically designed threaded socket flange.

Use this system to install a bathroom in a new or existing home.

System Includes

- 1/2 HP cast iron sewage pump with non-clog vortex impeller, tethered float and piggyback plug
- 18 x 30 structural foam basin
- 2D/2V 18" basin cover (2" threaded discharge flange, 2" threaded vent flange, access port with float pole, dedicated power cord and switch cord grommets
- 2 in. silent solvent weld shutoff check valve included
- 4" Stop "N" Seal Inlet Hub included
