

FR-12 Metal Ice Maker Outlet Box with Quarter-Turn Valves

Ice Maker Outlet Box Installation Instructions Metal

1. Remove the faceplate that is attached to the ice maker box and save for future installation.
2. Using either nails or screws, mount the box to the stud using the integrated flanges.
3. Box can be mounted on either side of the stud bay, at any height, in any orientation.
4. Connect the water supply piping to the ice maker box valve using correct connections.
5. Check all local codes for appropriate approvals and requirements.
6. To the 1/4" outlet of valve attach either:
 - a. Copper supply tubing via compression connection.
 - b. Poly supply tubing via compression connection - brass insert into poly tube is required
 - c. Braided hose via threaded connection.
7. Connect to the inlet connection of the refrigerator.
8. Attach washing machine water supply hoses to the 3/4 hose bibb outlets on the front of the appropriate valves and insert the washing machine drain hose into opening of the 2" drain line from inside the washer box. Make sure washing machine drain hose is secured so it does not come out under operation.
