

HIGH PERFORMANCE ROOF FLASHING

Fast, reliable repair for as long as you need it.

The most common cause of roof leaks is caused by a worn gasket around vent pipes that penetrate the surface of the roof. This allows water into the home, potentially causing significant property damage.

The Perma-Boot® vent pipe flashing system was engineered specifically to repair and prevent this type of leak with a patented gasketless design.

Long-Term Leak Protection

Perma-Boot® vent flashing is made of a durable and weather-resistant plastic, engineered to provide permanent protection from costly vent pipe gasket leaks.

Product Features

- Made from a UV stabilized polymer for enhanced durability
- Installs in minutes, no tools required
- Available in black or brown to match a variety of roofing materials
- Suitable for asphalt shingles, wood shake, slate, and composite roofing materials

Repair Models

These options are designed to quickly and easily fit over worn or leaking existing pipe and flashings without having to remove shingles or worn out collar. No tools are required!
