

PROSET®

IPS CORPORATION

Firestop solutions for Cast-in-Place (CIP) and “Precast” (cored hole) concrete construction

Protecting buildings and bottom lines

ProSet firestop penetrators deliver firestopping, smoke-proofing and waterproofing protection in one step with the installation of the piping system.

By combining these three jobs in a simplified, single-step install, ProSet firestop penetrators help keep projects on schedule while slashing materials and labor costs. Fabricated from lightweight PVC, ProSet firestop penetrators also enable pipe expansion and contraction, and help reduce pipe noise.

As the industry’s first firestop to meet UL and ASTM fire safety standards, ProSet firestop penetrators are backed by 40+ years of performance. Today’s ProSet line meets or exceeds all building and safety codes and outperforms competitive metallic and non-metallic products.

Versatile and adaptable, ProSet firestop penetrators can accommodate a range of multistory projects and are suitable for many other non-fire-rated applications, including unique swimming pool inlets and outlets and much more.

- Reduces project materials costs
- Cuts labor costs and requirements
- Speeds and simplifies installation

- Firestops, waterproofs and smoke-proofs
- Simplifies engineering/design layouts
- Complies with UL 1479 and ASTM E-814

PROSET FIRESTOP SOLUTIONS

System "A"

System "A" firestop penetrators are for pass-through piping applications, including water, gas, electrical, sprinklers and more. Available for CIP and cored hole applications

System "B"

System "B" firestop penetrators are for no-hub cast iron, copper, or steel piping, plus plumbing floor fixture openings. Available for CIP and cored hole applications

System "C"

System "C" firestop penetrators are for combustible DWV, acid waste and vent piping, plus plumbing floor fixture openings. Available for CIP and cored hole applications

Water Guard

Water Guard fittings provide an easy and reliable waterproofing solution for all ProSet systems.

Plumbing openings

ProSet offers firestop solutions for a range of openings, including water closets, showers, tubs, drains and more.

More value for multistory projects

- Multistory hotels
- Multifamily buildings
- Condominiums
- Apartments
- Dormitories
- Hospitals

LET US HELP WITH YOUR PROJECT

While ProSet firestop penetrators are designed for easy use and installation, our experts are here to assist with unique design challenges or answer any questions you may have – your project's success is our success!
