- Electrical utility submetering for resident's personal budget management
- Water utility submetering for resident's personal environmental impact mitigation
- Residential waste recycling program

# The Next Generation of Rental Apartments

We live in an age where the cost of living is rising to new heights. Soaring housing prices coupled with rising interest rates have snuffed out the dreams of many Canadians looking for, or maintaining, their perfect home.

We build quality apartments that provide Canadians with a new lease on lifestyle. There are no down payments, no interest payments, no property taxes or reassessments, and no home maintenance costs or headaches.

You deserve to live in a home that empowers you to achieve your goals and build a prosperous future for yourself and your family. When you make a Lépine apartment your home, you have more freedom to invest your time and money in the things you value.

Lépine Apartments is a family-owned and operated company. Our history can be traced back to the early days of Jacques Cartier's exploration of the "new world"—before the fur trade and colonization of Canada. Our ancestors sought out a new life of liberty and prosperity. They worked hard to build a land of opportunity for everyone and there's still a lot of work yet to be done! We continue to innovate and improve the Canadian quality of life by building premium quality rental housing using the best technology and materials available.

"When you build quality, you build a solid investment." Our family has lived by this motto for generations. It has served as our guiding principle as we charted our course in Canada's homebuilding industry for the last 70 years. We have built more than 7,000 units across 48 properties. An estimated quarter million Canadians have called one of our buildings their home at some point and Lépine has become known as a premier builder and landlord of resort-style apartment communities across Eastern Ontario.

We're thankful for the people who are foundational to creating a community within our buildings; people like you who care for your neighbors and want the best for our country. We want to join with you in developing a home you can be proud of and would be delighted to welcome you into your new lease on lifestyle.
