

### Micronized Chlorella (4 & 8 fl. oz)

- + Detox heavy metals
- + Supports the body's natural ability to clear toxins
- + Supports immune function
- + Supports blood pressure homeostasis
- + Supports oxygenation of the body thereby supporting endurance and resilience

## Detoxify

Detoxification is the first step toward regaining body system balance. Detoxification is a term that we use to describe the way our body eliminates toxins and waste products which it doesn't need to carry; namely heavy metals, toxic chemicals, or metabolic waste. The good news is that our body is designed to eliminate these toxins naturally, but it could use support.

Botanical and nutritive support, minerals, and energetic stimulus can allow the body to release what it doesn't want, or need. These products are formulated to increase the cells' capacity to release and remove toxic material, optimize metabolism, and nurture repair.

### DAILY DTOX ECD (4 & 8 fl. oz)

A safe and gentle detoxification product designed to support extra-cellular detoxification of all organs, blood, and lymph fluid.

### Lymph Care (1 fl. oz)

Supports the lymphatic system to remove excess waste, debris, dead blood cells, pathogens, abnormal cells, and toxins from the cells and the tissue spaces between them. One of our top sellers!
