

2019 Mongolia Season ReCap and 2020 Season Updates

2019 was another great season in Mongolia. We enjoyed some incredible fly fishing adventures with our wonderful returning guests and many new friends. Thank you to all!

Both Fish Mongolia (www.fishmongolia.com) and Mongolia River Outfitters (www.mongoliarivers.com) demonstrated the benefits of our long-term conservation efforts. We landed more mythical “trophy” taimen than ever before and we saw abundant numbers of juvenile taimen as well...both very positive indicators of the health of these fisheries.

As usual, the summer hopper fishing for trout and grayling was amazing. The autumn at MRO delivered impressive Amur Pike, Amur trout, and plenty of Lenok. These fish are often overlooked but can be a real highlight of any trip to Mongolia.

Our first full season on the new Buryat Headwaters expedition into the upper headwaters and the birthplace of Chingis Khan was a great success. On these special trips, guests really appreciate the privilege of only two anglers sharing this beautiful stretch of river.

The camps and operations continue to get better and better. We upgraded the ger accommodations at all of the camps and added several more brand new Clackacraft drift boats over at MRO. And our guests raved about the food!

"We had an amazing trip in Mongolia. Thank you all so much for your help planning and executing the trip!!! Especially Ganna!! Paul and I caught some beautiful fish. Thanks to Tulga the Taiman whisperer. The rest of the crew were great as well. Excellent service and food, beer and wine. The country is beautiful and the people are very nice. We even had tea with a 3 star general of the Mongolian Army!"

-- Kip T.

Our 2020 and 2021 seasons are filling quickly, and we will soon release 2022 dates. If you are interested to join one of these amazing fly fishing adventures, please contact us today at info@mongoliarivers.com.
