### Our Cover

This month shows a view of the earth as seen from the moon, which Baron Muechhausen describes so well in the story, "Baron Muechhausen's Scientific Adventures," by Hugo Gernsback. For the inhabitants of the moon at this particular time, it is "The New Earth." The Baron is getting ready to make a landing on the moon in his marvelous space flyer.

### COPYRIGHT ACKNOWLEDGEMENT

"The Master of the World," by Jules Verne, copyright, 1911, by Vincent Parke & Co. (Parke, Austin and Lapscomb Co.)

## In Our Next Issue:

- THE RETURN OF THE MARTIANS**, by Cecil B. White. Being an astronomer, our author is well informed on this subject and in this sequel to *The Retreat to Mars*, he gives us a most unusual as well as powerfully written story, which is not too technical to hold the interest of any reader, no matter what his inclinations might be.
- THE ANCIENT HORROR**, by Hal Grant. Pre-historic monsters are no novelty in literature, but here is one so totally different and the story is so well written that by the time you are through reading the story, you will not be at all sure that it is not entirely truth that you have read. This is an excellent tale that is sure to give you half-hour's interesting reading.
- BARON MUECHHAUSEN'S ADVENTURE**, by Hugo Gernsback. In Installments 3 and 4 the wily Baron gives us in detail, a picturesque story and description of his space flyer, his trip to the moon, his landing on the moon and his views of the earth from the moon.
- THE MASTER OF THE WORLD**, (A Serial in Two Parts) Part II, by Jules Verne. In this installment, the uncanny appearances and disappearances of the mysterious thing that threatens the safety of the world continue until Strock, the Inspector of the Police and head detective, solves the mystery in an extremely unexpected manner.
- TEN MILLION MILES SUNWARD**, by Geoffrey Hewelcke. We wager that the interest that this story will arouse, will be as great as that of "Doctor Meuiresno." While it has nothing to do with the Fourth Dimension, it evolves a most novel point to change the axis of the earth by human energy. It is one of the cleverest stories of this kind that we have ever seen. And when you have finished the story, we will ask you what is wrong with it.

And others.

Send postal for risk rate card. Single copies 25 cents. Remittance in advance. OUR EXPLANATION of your subscription we enclose a personal check in your name to pay for it, and notify you by mail. The order to receive your order and remittance for a renewal, delivery of the magazine is stopped. CHANGE OF ADDRESS. ## Worlds Unknown

—By Leland S. Copeland.

A billion stars have merged their sheen  
To form a disk of light  
Beyond the frigid silences  
That void eternal night;  
Ten million years away it looms,  
A telescopic sight.

The dinosaur was lord of earth,  
In Mesozoic days,  
And neither ape nor man had life  
When that vast stellar maze  
Beyond the gulfs of time released  
The light that meets our gaze.

And lost within that universe,  
Within its milky way,  
How many worlds around their suns  
Have woven night and day  
For countless thinking things like men,  
Now deep in stone or clay.

Their stories, caught in light, have come  
To us unskilled to know  
The comedy and tragedy,  
The glint of friend and foe,  
Within this cryptic message from  
A far and long ago.
