PNC Stadium

PNC Stadium is a state-of-the-art, open-air stadium designed to host Houston Dynamo Football Club matches, Houston Dash matches and Texas Southern University football games as well as additional professional, collegiate and community sporting events, concerts, exhibitions, conventions and special events. Opened on May 12, 2012, the 340,000-square foot, 21,283-seat stadium is the first soccer-specific stadium in Major League Soccer located in a city's downtown district.

An architecturally stunning building, the stadium features 94,000 square feet of aluminum panels on its exterior, giving it a modern and stylish appearance. Each of the panels is 50 percent open to improve air flow throughout the concourses. Canopies extend 75 feet over the stands on the east and west sides of the stadium, and a stage canopy extends 125 feet over the south end, providing shade to soccer fans and a built-in speaker setup for concerts.

With its downtown location, the stadium is a part of a true 'Stadium District,' which includes Minute Maid Park and the Toyota Center, as well as the George R. Brown Convention Center, Discovery Green, Warehouse Live and House of Blues.

The venue was awarded the LEED® Silver certification from the U.S. Green Building Council in December 2012. The stadium has been identified as a pioneering example of new construction and sustainable design and is considered a leader in transforming the building industry.
