QUOTE SHEET

KRISTIЈAN KAHLINA

On the final preseason game against Inter Miami:

"We can't show 100% of our quality, because it's over 20 new guys, each of us arrived thinking of the game differently but day-by-day we absorb what coach is teaching us in trainings. The last game, against Inter Miami was really, really good. We got unlucky, but if we remove the results, and focused on how we played, for me, this was the best game [we've played] in preseason. I think we have a good connection now, but naturally we will improve and improve... I don't know how we will start but after one or two months you will see that this Club has quality and has very good players."

On his team and personal goals for the season:

"Playoffs are the dream for us, and we will work hard for this and not give up after one, two, five, six, or ten rounds, we will not give up. We brought in players who want to achieve something. I didn't come here to mess around in the USA, or just enjoy the lifestyle, I came here to work and my team will show this."

MIGUEL ÁNGEL RAMÍREZ

On formations and how he prepares the team for matches:

"I'm not going to stick to only one formation, in the end I see this as a game where your opponent tells you where to defend and where to attack. It will always depend on the opponent what formation we use. I don't believe one formation can go up against all of them. D.C. [United] will be different, they play different. We need to analyze our next opponent and what are their behaviors and then we will define the formation, the players who can help this formation... every game will be different."

On the improvement of the squad throughout preseason:

"From the first day [of the Carolina Challenge Cup] I'm seeing better individual behaviors, they [the team] are doing better, they are understanding much better in terms of structure. For me the most important [thing] is structure, how they need to position themselves when attacking and defending. From now on, now that they have the basics, we will go more specific in the trainings, specific situations, what do in these situations. For the basics, positioning, and the structure I am happy they are understanding."

"But for me the most important [thing] is that until the end we are competing, this is the best for me, a team that doesn't lose their composure, that keeps fighting and competing until the end. If we do this, later we will keep improving in other terms."
