Installation manual

FENDER EXTENSION KIT FOR ZFORCE 500/800 TRAIL

NOTE: CFMOTO will not be responsible for any damage caused by improper assembly. CFMOTO recommends that all original accessories be assembled by an authorized CFMOTO dealer.

Before assembly, park the vehicle on a level surface, place the transmission gear in the Park (P) position and turn off the key switch.

1 - Each wing extension has holes for installation.

2 - Align the fender extensions on the vehicle. Once the extension is aligned, drill a hole in the plastic of the vehicle with drill 19/64 at the location corresponding to the hole in the fender extension.

Note that in some places on the vehicle, push rivets or push rivet holes may already be present.

3- Once the holes have been drilled, align the fender extension on the vehicle and secure it using the push rivets.
