

**How to ITH Vax Card
snap tab, eyelet , or
slit version**

Materials:

Medium to heavy weight
cutaway stabilizer.

505 spray

Tapey tape

For Snap tab version

(1) vinyl 4 ½" x 7" for front

(1) vinyl or oly fun 4 ½" x7"
for back

(1) Piece 16g or 18g clear
vinyl 4 ½" x 5"

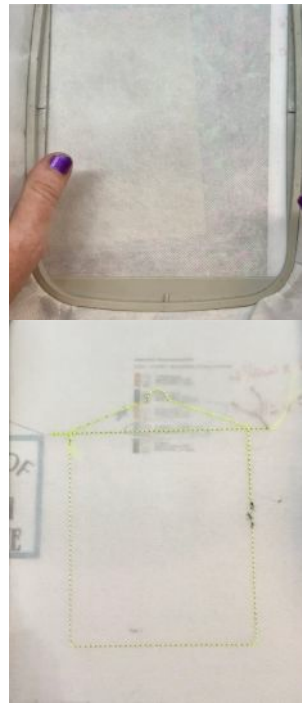

For eyelet version

(1) vinyl 4 ½" x 6" for front

(1) vinyl or oly fun 4 ½" x6"
for back

(1) Piece 16g or 18g clear
vinyl 4 ½" x 5"

Before we get start
stitching, let's take a
look at the Color Stop
PDF that came in your
zip file.

Step 1: Guess what
step 1 is? If you
guessed hoop up some
medium-heavy weight
cutaway, you win!!

Run Color Stop 1 on
your blank stabilizer
only. This is going to
give you the die line so
you know where in the
hoop to place your
vinyl.

**Yes! There are funny
lines sticking out the
sides, we'll use those
later.**

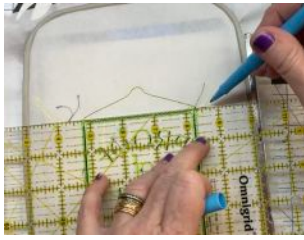

Step 2: Place the vinyl
for the front of the Vax
Card holder making
sure to completely
cover your die lines.
**Run all color stops but
the last 2 for eyelet
and snap tab versions;
the last color stop for
the "slit" version.**

The first color stop is the Die line that will show you
where to place your vinyl. You're going to run this
before placing your vinyl.

The next few colors are going to be detailed design

The 2nd to last color stop is your eyelet or snap tab
hole die liner

The last color stop is your final outline. On the "slit"
version, the satin rectangle is stitched with the final
color stop.

Step 3: The design is now stitched and it's time to add the vinyl or oly fun to the back. Flip the hoop over and find those extra die lines we mentioned earlier and use a ruler and pen/pencil/marker to extend them. Tape your Pretty vinyl on so it's covering the main die line Next Take our clear vinyl and place the edge so they line up with those funny die lines sticking out on the sides. Tape everything down good and then place a piece of the clear plasticity WSS over the top of it all and tape that down. This will keep things from sticking to the machine bed and/or getting caught. **Run the final 2 color stops for eyelet and snap versions; the last color stop for the "slit" version.**

Step 4: Unhoop, remove the WSS, and Carefully cut out your vax card holder making sure that you are at least 1/8" away from your stitch lines.

Step 5: Use a leather punch to open the snap tab or eyelet holes

Step 6: Place your snaps or eyelet and set using your favorite setting tool.

Done! Go Forth and show everyone you've been vaxxed!
