

ASCENSION

MIDI WORKSTATION

QUICK INSTALL GUIDE

- Download the plugin installer for your system.
- Download the 'ASCENSION-DATA-1.0.1.zip' archive and unzip the folder to any location on your HD.
- Scroll down this document to find out how to activate your plugin.

Windows Installation

Ascension's installer application will prompt you agree with the software license, then select which plugins you would like to install, and your VST plugins directory.

Once installed, open an instance of Ascension in your DAW or the standalone version, you will then be prompted to locate your data folder.

Mac Installation

Ascension's installer will prompt you agree with the software license. You will then be guided through the installation process.

After your download has finished, the installer will place your selected plugins in your Mac's system library folder - [Library\ Audio\ Plug-Ins].

Once installed, open an instance of Ascension in your DAW or the standalone version, you will then be prompted to locate your data folder.

Activation

Once you have installed Ascension, the plugin will run in demo mode until registered.

To register Ascension make sure you have your Serial Code to hand. This was emailed to you when you purchased Ascension. If you cannot find your Serial Code please [contact support here](#).

Open the plugin and click the blue 'OPTIONS' button on the right hand side of the plugin interface, then choose 'Settings'.

On this tab you will see your 'Hardware ID'. Click to copy your ID and then visit the [click here to visit the Ascension activation page](#).

Ascension VST/AU - Activation
